Vancouver, October 21, 2025 - [BP Silver Corp.](#) (TSXV: BPAG) ("BP Silver" or the "Company") announces that it has finalized targets for initial drill testing and has selected Maldonado Exploraciones, a premier Bolivian drilling contractor, to carry out the upcoming drill program at its Cosuño Silver Project ("Cosuño") in Bolivia.

Tim Shearcroft, CEO of BP Silver, commented: "We are pleased to be moving forward with Maldonado for our inaugural drilling at the Cosuño Silver project. Following last month's successful \$2.5 Million financing, we have expanded the program to include additional drill holes. We have waited patiently for this moment, and with record-high silver prices, the timing couldn't be better."

Cosuño Project Highlights:

- Large untested silver rich hydrothermal system which outcrops over ~10.5 km² (Figure 1).
- Remote sense analysis, surface mapping and geochemical sampling confirms the presence of advanced argillic alteration and an associated outcropping mineralized lithocap such as seen at other (large) productive Bolivian systems.
- Target generation has defined 4 targets containing silver-rich polymetallic mineralization with grades up to 1035 g/t Silver for initial drilling testing (Figure 2).
- Drill pad preparation is underway, and drilling is anticipated to commence in early November.
