Management Commentary

Ed Kruchkowski, President of Decade Resources, stated:

"Decade had an opportunity to pick up an exciting copper-gold prospect sitting on a proven porphyry trend, yet never drill tested. In 2013, J. M. Logan and M.G. Mihalynuk of the British Columbia Geological Survey, Ministry of Energy, Mines and Natural Resources visited the Bonaparte property. They reported that metal and alteration assemblages at the Bonaparte are shared by other porphyry deposits of the Early Jurassic Takomkane-Wildhorse magmatic belt (Brenda Cu-Mo, Woodjam Au, Cu-Mo porphyry deposits) suggesting the mineralization discovered to date at the Bonaparte property represents the upper levels of a buried porphyry system. The Company QP visited the property and confirmed the presence of copper mineralization within exposed intrusive rocks. The Company is planning a maiden drill program on the copper-gold portion of the property and has applied for the necessary permits"

The Company would also like to report that it has granted 6,000,000 incentive stock options to directors and consultants of the Company (the "Options") pursuant to the Company's stock option plan. The Options have a term of 5 years and are exercisable at a price of \$0.05 per common share. Of the 6,000,000 Options granted, an aggregate of 4,000,000 were granted to directors.

Clarification on Use of Proceeds and Finder's Fee from Private Placement that closed on October 9, 2025

None of the proceeds from the financing will be used for payments to non-arm's-length parties of the company, or to persons conducting investor relations activities. Also, each finder's warrant, that was issued, is exercisable into one common share of the Company at a price of \$0.05 per share for a two-year period and expiring on October 7, 2027.
