

# Nine Mile Metals Announces Drill Rig Mobilization for the Wedge Copper - Gold Drill Program

03.11.2025 | [Newsfile](#)

Toronto, November 3, 2025 - [Nine Mile Metals Ltd.](#) (CSE: NINE) (OTC Pink: VMSXF) (FSE: KQ9) (the "Company" or "Nine Mile") is pleased to announce that Orbit Garant has mobilized a YS2000 Skid Mounted Drill Rig for the upcoming Wedge drill program. The drill rig is enroute from Sudbury Ontario and is anticipated to arrive at Orbit Garant's facility in Dieppe, New Brunswick on November 3<sup>rd</sup> for hydraulics servicing and winterization. The expected arrival onsite in Bathurst is Monday November 10<sup>th</sup>.

Last year's successful drill program concentrated on the new eastern extension of the Wedge Mine and successfully expanded the footprint of the deposit, supporting our new geophysical technology and interpretation modelling. This drill program focuses on the "new" western extension of the deposit and will also be testing the model at depth. Apex Geoscience, Mike Dufresne, P. Geo. & Technical Advisor, has modelled up to (7) drill holes, (5) Upper Zone & (2) Lower Zone, testing the western copper zone and the body at depth. The objective is to obtain the depth of mineralization of this higher-grade Copper Lens, and to prove a larger western footprint, adding new tonnage to the deposit model. Upon completion, we will add the new drill data to our 3D live Modeling, including Geological, Geophysical and Drill Hole Cross-section results.

Orbit Garant Drilling is ECOLOGO accredited. Recognized for their Mineral Exploration Services Certified for Responsible Environmental and Social Best Practices.

Headquartered in Val-d'Or, Quebec, Orbit Garant Drilling is one of Canada's largest drilling companies providing both underground and surface drilling services in Canada and internationally. With more than 185 drill rigs and over 1000 specialized employees, Orbit Garant offers drilling services to major, intermediate and junior mining companies at every stage of mine exploration, development and production.

Gary Lohman, VP Exploration, Director, stated, "We are looking forward to testing both the western extension and the depth of the deposit with the drill holes designed by Mike Dufresne and the geophysical team at Apex Geoscience. With previous mining and exploration limited to the upper portions of the deposit, this series of drill holes will expand the mineralized footprint, as we accomplished in the east, adding to the resource. All drill holes will be capped on completion to facilitate downhole geophysics (BHEM) which, along with the cross-section drill results, assists in resource 3D modeling and exploration planning. We look forward to sharing our first results."

Orbit Garant On-site Drill Program Inspection Prep Visit (10-29-25).

About Nine Mile Metals Ltd.:

Nine Mile Metals Ltd. is a Canadian public mineral exploration company focused on VMS (Cu, Pb, Zn, Ag and Au) exploration in the world-famous Bathurst Mining Camp, New Brunswick, Canada. The Company's primary business objective is to explore its four VMS Projects: Wedge VMS Project, Nine Mile Brook VMS Project, California Lake VMS Project, and the Canoe Landing Lake (East - West) VMS Project. The

Company is focused on Critical Minerals Exploration (CME), positioning for the boom in EV and green technologies requiring Copper, Silver, Lead and Zinc with a hedge with Gold.

This press release may include forward-looking information within the meaning of Canadian securities legislation, concerning the business of Nine Mile. Forward-looking information is based on certain key expectations and assumptions made by the management of Nine Mile. In some cases, you can identify forward-looking statements by the use of words such as "will," "may," "would," "expect," "intend," "plan," "seek," "anticipate," "believe," "estimate," "predict," "potential," "continue," "likely," "could" and variations of these terms and similar expressions, or the negative of these terms or similar expressions. . Forward-looking statements in this press release include that (a) prior to commencing the 2023 exploration drill program, the ground will be mapped at surface and representative samples analyzed to determine the base and precious metal assay values , (b) the Ag and Au values will be reported upon receipt of the certified assay results from ALS Global, and (c) our current financial raise will enable us to drill the Wedge Project (along with our Canoe Landing VMS Project and follow up exploration work on our California Lake VMS Project) this season as opposed to next year. Although Nine Mile believes that the expectations and assumptions on which such forward-looking information is based are reasonable, undue reliance should not be placed on the forward-looking information because Nine Mile can give no assurance that they will prove to be correct.

The Canadian Securities Exchange (CSE) has not reviewed and does not accept responsibility for the adequacy or the accuracy of the contents of this release.
