

Vortex Energy Corp. Announces Submission of Abstract for Presentation at the 2026 Canadian Hydrogen Convention

04.11.2025 | [GlobeNewswire](#)

[Vortex Energy Corp.](#) (CSE: VRTX) (OTC: VTECF) (FSE: AA3) ("Vortex" or the "Company") is pleased to announce that the University of Alberta has submitted an abstract titled "Structure Assessment of the Robinson River Salt Dome for Hydrogen Storage" to the Canadian Hydrogen Convention committee, in relation to an opportunity to present at the Edmonton Convention Centre between April 21-22, 2026.

The presentation will outline the results and interpretation of the ambient noise tomography (ANT) survey conducted over the Robinsons River Salt Dome, a key step in evaluating the site's suitability for potential underground hydrogen storage. The research team, led by Dr. Hassan Dehghanpour from the University of Alberta, in collaboration with CAUR Technologies Inc. and Vortex Energy Corp., applied passive-seismic imaging to delineate the dome's internal structure and mechanical integrity.

Preliminary findings highlight the ability of ANT methods to image halite-rich sequences and impurity-bearing layers within the Codroy Group evaporites, providing a foundation for assessing hydrogen containment potential in Atlantic Canada.

"We are proud to see our academic partners recognized on a national stage for advancing innovative, low-impact geophysical methods that align with Canada's growing clean energy goals," said Paul Sparkes, CEO of Vortex Energy Corp. "This abstract submission underscores the collaborative strength of industry and academia in developing Canada's first-generation hydrogen storage infrastructure." The Canadian Hydrogen Convention is the country's premier hydrogen event, bringing together researchers, policymakers, and industry leaders to advance Canada's clean energy future. Qualified Person

The scientific and technical content of this news release has been reviewed, verified, and approved by Jared Suchan, Ph.D., P.Geo., VP of Exploration at the Company, and a "Qualified Person" as defined by National Instrument 43-101.

For a discussion of the Company's QA/QC and data verification processes and procedures, please see the Company's technical report entitled, Independent Technical Report on the Robinsons River Salt Property dated July 31, 2023, a copy of which may be obtained under the Company's profile at www.sedarplus.ca.

The Company acknowledges the financial support of the Junior Exploration Assistance (JEA) Program, administered by the Department of Industry, Energy and Technology, Government of Newfoundland and Labrador.

About Vortex Energy Corp.

Vortex Energy Corp. is an exploration stage company engaged principally in the acquisition, exploration, and development of mineral properties in North America. The Company is currently advancing its Robinson River Salt Project comprised of a total of 942 claims covering 23,500 hectares located approximately 35 linear kms south of the town of Stephenville in the Province of Newfoundland & Labrador. The Robinson River Salt Project is prospective for both salt and hydrogen salt cavern storage. The Company is also currently advancing its Fire Eye Uranium Property in the Athabasca Basin, a region renowned for its uranium deposits.

Cautionary Note Regarding Forward-Looking Statements

Certain statements contained in this press release constitute forward-looking information. These statements relate to future events or future performance. The use of any of the words "could", "intend", "expect", "believe", "will", "projected", "estimated" and similar expressions and statements relating to matters that are not historical facts are intended to identify forward-looking information and are based on the Company's current beliefs or assumptions as to the outcome and timing of such future events. In particular, this press release contains forward-looking information relating to, among other things, the Company's exploration plans in relation to its mineral projects.

Various assumptions or factors are typically applied in drawing conclusions or making the forecasts or projections set out in forward-looking information, including, in respect of the forward-looking information included in this press release, assumptions regarding the Company's ability to execute on its exploration plans, including that it will be successful in carrying out the planned assessment and evaluation work, and that such analytical work will yield the expected information and the desired outcomes.

Although forward-looking information is based on the reasonable assumptions of the Company's management, there can be no assurance that any forward-looking information will prove to be accurate. Forward-looking information involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. Such factors include, among other things, the risk that exploration at the Company's mineral projects does not proceed in the manner and on the timeline currently contemplated, or at all; risks inherent in the exploration and development of mineral deposits, including risks relating to receiving requisite permits and approvals, changes in project parameters or delays as plans continue to be redefined, that mineral exploration is inherently uncertain and that the results of mineral exploration may not be indicative of the actual geology or mineralization of a project; and that mineral exploration may be unsuccessful or fail to achieve the results anticipated by the Company, including as a result of factors beyond the Company's control, such as geological conditions. The forward-looking information contained in this release is made as of the date hereof, and the Company not obligated to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, except as required by applicable securities laws. Because of the risks, uncertainties and assumptions contained herein, investors should not place undue reliance on forward-looking information. The foregoing statements expressly qualify any forward-looking information contained herein.

The Canadian Securities Exchange has not reviewed, approved, or disapproved the contents of this press release.
