

West Point Gold Extends Gold Mineralization at NE Tyro; Drills 24.4 m of 1.63 g/t Au near surface; Commences Drilling at Tyro NE Deep

05.11.2025 | [Newsfile](#)

[West Point Gold Corp.](#) (TSXV: WPG) (OTCQB: WPGCF) (FSE: LRA0) ("West Point Gold" or the "Company") announces additional drill results from its 10,000 metre (m) drill program at its flagship Gold Chain Project in Arizona. The Company is reporting assay results for drill holes GC25-76 to GC25-78, representing 255 metres; the results of six holes remain pending.

Highlights:

- Hole GC25-77 intersected 24.4 m of 1.63 g/t Au, including 3.0 m of 7.14 g/t Au, less than 30 m below the surface
- Hole GC25-78 intersected 22.9 m of 1.56 g/t Au
- Hole GC25-76 intersected 4.6 m of 0.35 g/t Au
- The results for GC25-77 and -78 continue to push the gold mineralization to the northeast (Figure 2)
- Assay results are pending for an additional 6 completed holes (approximately 471 m).
- Drilling to extend the high-grade zone at NE Tyro to depth beneath holes GC25-47 to -49, and GC25-58 to GC25-60, is underway

"The shallow drill holes establish that the Tyro Main zone displays continuity of mineralization both vertically and along strike. This bodes well for the planned maiden resource, expected to be released in 2026. Additionally, drilling is underway to extend the high-grade zone at NE Tyro to depth, following up on GC25-48 - 28.96 m of 6.02 g/t Au and GC25-49 - 30.48 m of 9.05 g/t Au. We expect that success in extending this zone to depth should have a positive impact on the planned maiden resource," stated Derek Macpherson, Executive Chairman.

Figure 1: Plan view of the Main Tyro vein showing geology and drilling conducted in 2021, 2023, 2024 and 2025. Note the location of Hole Nos. GC25-76 to -78.

Table 1: Drill Results

| Holes | From (m) | To (m) | Width (m) | Grade (g/t Au) |
|-----------|----------|--------|-----------|----------------|
| GC25-76 | 24.4 | 29.0 | 4.6 | 0.35 |
| GC25-77 | 21.3 | 45.7 | 24.4 | 1.63 |
| including | 21.3 | 24.3 | 3.0 | 7.14 |
| GC25-78 | 24.4 | 47.2 | 22.9 | 1.56 |

- All widths shown are downhole; true widths are approximately 70-90% of downhole widths.

Summary

The initial portion of the 10,000-metre drill program at Gold Chain has been completed with 1,177 m drilled in

15 holes across the Tyro Main Zone. This early phase is designed to establish the data foundation necessary to define a maiden resource estimate that starts at surface.

The final shallow holes across the NE Tyro zone (see Table 1) were successful in defining a limit to near-surface mineralization in Hole GC25-76. The results indicate a gap in the gold-rich zone, extending up to 100 metres and centred on a pronounced bend in the vein system (Figure 1). Further to the northeast, Holes GC25-77 and GC25-78 extend near-surface mineralization to the northeast about 100 m from the NE Tyro stopes. Surface mapping and sampling have identified strong gold mineralization over about 200 m of vein strike, but drilling to date suggests that the vein system widens at depth, accompanied by an important increase in gold grades (Figure 2).

Holes GC25-77 and GC25-78

Holes GC25-77 and GC25-78 were drilled on Line 1030 (Figure 2), where surface mineralization (Trench 13: 4.7 m at 7.64 g/t Au) disappears beneath alluvium at about 100 m southwest of the Tyro patented claim endline. Both holes intercepted about 20 m of 1.6 g/t Au and better define the limit of near-surface mineralization. Deeper drilling (GC25-58 - 30.4 m at 2.1 g/t Au; Figure 3) suggests that the vein system widens at depth and may plunge steeply to the northeast toward the Frisco Mine fault, the southwest boundary to the Frisco Graben. These results support grade and width continuity in this part of the vein system. Figure 2 highlights the proposed targets that will be tested at NE Tyro during the ongoing 10,000m drilling campaign.

Qualified Person

Robert Johansing, M.Sc. Econ. Geol., P. Geo., the Company's Vice President, Exploration, is a qualified person ("QP") as defined by NI 43-101 and has reviewed and approved the technical content of this press release. Mr. Johansing has also been responsible for overseeing all phases of the drilling program, including logging, labelling, bagging and transport from the project to American Assay Laboratories of Sparks, Nevada. Drillholes have a diameter of about 10cm, and samples have an approximate weight of 5 to 10kg. Samples were then dried, crushed and split, and pulp samples were prepared for analysis. Gold was determined by fire assay with an ICP finish, and over-limit samples were determined by fire assay and gravimetric finish. Silver plus 15 other elements were determined by Aqua Regia ICP-AES (IM-2A16), and over-limit samples were determined by fire assay and gravimetric finish. Both certified standards and blanks were inserted on site along with duplicates, standards and blanks inserted by American Assay. The results summarized above have been carefully reviewed with reference to the QA/QC results. Standard sample chain of custody procedures were employed during drilling and sampling campaigns until delivery to the analytical facility.

About West Point Gold Corp.

West Point Gold Corp. is a publicly listed company focused on gold discovery and development across four Walker Lane Trend projects in Nevada and Arizona, USA. West Point Gold is focused on developing a maiden resource at its Gold Chain project in Arizona, while its JV partner, Kinross, is advancing the Jefferson Canyon project in Nevada.

FORWARD-LOOKING STATEMENTS:

Certain statements contained in this press release constitute forward-looking information. These statements

relate to future events or future performance. Forward-looking statements include estimates and statements that describe the Company's future plans, objectives or goals, including words to the effect that the Company or management expects a stated condition or result to occur. The use of any of the words "could", "intend", "expect", "believe", "will", "projected", "estimated" and similar expressions and statements relating to matters that are not historical facts are intended to identify forward-looking information and are based on the Company's current belief or assumptions as to the outcome and timing of such future events including, among others, assumptions about future prices of gold, silver, and other metal prices, currency exchange rates and interest rates, favourable operating conditions, political stability, obtaining government approvals and financing on time, obtaining renewals for existing licenses and permits and obtaining required licenses and permits, labour stability, stability in market conditions, availability of equipment, availability of drill rigs, and anticipated costs and expenditures. The Company cautions that all forward-looking statements are inherently uncertain, and that actual performance may be affected by a number of material factors, many of which are beyond the Company's control. Such factors include, among other things: risks and uncertainties relating to West Point Gold's ability to complete any payments or expenditures required under the Company's various option agreements for its projects; and other risks and uncertainties relating to the actual results of current exploration activities, the uncertainties related to resources estimates; the uncertainty of estimates and projections in relation to production, costs and expenses; risks relating to grade and continuity of mineral deposits; the uncertainties involved in interpreting drill results and other exploration data; the potential for delays in exploration or development activities; uncertainty related to the geology, grade and continuity of mineral deposits; the possibility that future exploration, development or mining results may vary from those expected; statements about expected results of operations, royalties, cash flows, financial position may not be consistent with the Company's expectations due to accidents, equipment breakdowns, title and permitting matters, labour disputes or other unanticipated difficulties with or interruptions in operations, fluctuating metal prices, unanticipated costs and expenses, uncertainties relating to the availability and costs of financing needed in the future and regulatory restrictions, including environmental regulatory restrictions. The possibility that future exploration, development or mining results will not be consistent with adjacent properties and the Company's expectations; operational risks and hazards inherent with the business of mining (including environmental accidents and hazards, industrial accidents, equipment breakdown, unusual or unexpected geological or structural formations, cave-ins, flooding and severe weather); metal price fluctuations; environmental and regulatory requirements; availability of permits, failure to convert estimated mineral resources to reserves; the inability to complete a feasibility study which recommends a production decision; the preliminary nature of metallurgical test results; fluctuating gold prices; possibility of equipment breakdowns and delays, exploration cost overruns, availability of capital and financing, general economic, political risks, market or business conditions, regulatory changes, timeliness of government or regulatory approvals and other risks involved in the mineral exploration and development industry, and those risks set out in the filings on SEDAR+ made by the Company with securities regulators. Although the Company believes that the assumptions and factors used in preparing the forward-looking information in this corporate press release are reasonable, undue reliance should not be placed on such information, which only applies as of the date of this news release, and no assurance can be given that such events will occur in the disclosed time frames or at all. The Company expressly disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, other than as required by applicable securities legislation.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
