MAX Power Mining Corp. (OTC: MAXXF) (CSE: MAXX) at Forefront of Natural Hydrogen Discovery Efforts

14:30 Uhr | GlobeNewswire

NEW YORK, Nov. 11, 2025 - via InvestorWire - MAX Power Mining Corp. (OTC: MAXXF) (CSE: MAXX) today announces its placement in an editorial published by NetworkNewsWire ("NNW"), one of 75+ brands within the Dynamic Brand Portfolio@IBN (InvestorBrandNetwork), a specialized communications platform with a focus on financial news and content distribution for private and public companies and the investment community.

Artificial intelligence (AI) isn't just changing technology - it's rewriting the global energy equation. The world's smartest machines now require staggering amounts of electricity, pushing grids to their limits as nations and corporations scramble to secure clean, scalable power to meet both industrial growth and net-zero commitments. Among the emerging contenders in this power space, one stands out for its simplicity and promise: natural hydrogen.

And at the forefront of this discovery effort is MAX Power Mining Corp.-the first public company in North America focused on commercial-scale natural hydrogen development. MAX Power controls Canada's largest permitted land package for natural hydrogen in the pro-energy province of Saskatchewan, highlighted by the 275-mile (475 km) Genesis Trend that's now believed to extend into Montana and the Dakotas. MAX Power has just commenced drilling its first dedicated natural hydrogen well at its Lawson target on Genesis, kicking off a historic multi-well program targeting what could become the world's first commercial discovery of this clean, emissions-free energy source

About MAX Power Mining Corp.

MAX Power is an innovative mineral exploration company focused on North America's shift to decarbonization. The company is a first mover in the rapidly growing natural hydrogen sector where it has built a dominant district scale land position with approximately 1.3 million acres (521,000 hectares) of permits covering prime exploration ground prospective for large volume accumulations of natural hydrogen. High priority initial drill target areas have been identified for commencement of drilling in Q4 2025. MAX Power also holds a portfolio of properties in the United States and Canada focused on critical minerals. These properties are highlighted by a 2024 diamond drilling discovery at the Willcox Playa Lithium Project in southeast Arizona.
