

Atlas Salt Inc. Signs Strategic MOU with Hatch as Lead Engineering and IPD Partner for the Great Atlantic Salt Project

12.11.2025 | [ACCESS Newswire](#)

[Atlas Salt Inc.](#) ("Atlas Salt" or the "Company") (TSXV:SALT) (OTCQB:REMRF) announces that it has signed a comprehensive non-binding Memorandum of Understanding ("MOU") with Hatch Ltd. ("Hatch") establishing Hatch as the Lead Engineering Partner and Integrated Project Delivery ("IPD") Partner for the Great Atlantic Salt Project (the "Project").

Hatch brings over seven decades of global experience designing and delivering some of the world's largest underground soft-rock mines and has a strong presence in Newfoundland and Labrador. Their mandate within the Project is to integrate all engineering disciplines under an IPD framework, aligning safety, design efficiency, and execution certainty with Atlas Salt's development strategy.

Key Elements of the Partnership

- **Safety and Sustainability Leadership:** Hatch's "No Harm" approach to project delivery emphasizes safety-in-design and environmental stewardship, ensuring that health, safety, and environmental performance are prioritized from concept through operations.
- **Integrated Project Delivery:** As a full IPD partner, Hatch will collaborate closely with Atlas Salt and other IPD firms to deliver coordinated engineering, risk management, and project controls, reducing execution risks and driving efficient decision-making.
- **Digital Engineering and Project Tools:** Hatch will apply advanced digital design systems and information management platforms to streamline engineering, procurement, and construction sequencing, ensuring efficiency and readiness for operations.
- **Local Presence:** With a long-standing office in St. John's, Newfoundland, Hatch is well-positioned to provide on-the-ground support and collaborate directly with Atlas Salt throughout the design and execution phases.
- **Proven Soft-Rock Mining Expertise:** Hatch has successfully led engineering and delivery on major underground mining projects across Canada, including potash, nickel, and salt operations. Their deep bench of subject-matter experts in mine, port, and infrastructure design positions the Great Atlantic Salt Project for success.

Management Commentary

Nolan Peterson, CEO of Atlas Salt, stated:

"Hatch's addition to our Integrated Project Delivery team is a pivotal milestone for the Great Atlantic Salt Project. Their proven track record in large-scale soft-rock mining, combined with their strong presence in Newfoundland and Labrador and commitment to safety and sustainability, provides Atlas Salt with the confidence that the Project will be engineered to the highest global standards."

Mike Watters, Global Lead, Mine Infrastructure of Hatch, stated:

"We are honoured to partner with Atlas Salt on this important project for Newfoundland and Labrador. By applying our integrated project delivery model, digital engineering tools, and commitment to community engagement, Hatch will help ensure the Great Atlantic Salt Project is delivered safely, efficiently, and sustainably."

Cautionary Statement

Neither the TSX Venture Exchange nor its Regulation Services Provider, (as the term is defined in the Policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release. This press release includes certain "forward-looking information" and "forward-looking statements" (collectively "forward-looking statements") within the meaning of applicable Canadian securities legislation. All statements, other than statements of historical fact, included herein, without limitation, statements relating to the future operating or financial performance of the Company, are forward-looking statements. Forward-looking statements are frequently, but not always, identified by words such as "expects", "anticipates", "believes", "intends", "estimates", "potential", "possible", and similar expressions, or statements that events, conditions, or results "will", "may", "could", or "should" occur or be achieved. Forward-looking statements in this press release relate to, among other things: obtaining financing, completion, delivery and timing of project components and requirements, and analysis and assumptions related thereto. Actual future results may differ materially. There can be no assurance that such statements will prove to be accurate, and actual results and future events could differ materially from those anticipated in such statements. Forward-looking statements reflect the beliefs, opinions and projections on the date the statements are made and are based upon a number of assumptions and estimates that, while considered reasonable by the respective parties, are inherently subject to significant business, technical, economic, and competitive uncertainties and contingencies. Many factors, both known and unknown, could cause actual results, performance or achievements to be materially different from the results, performance or achievements that are or may be expressed or implied by such forward-looking statements and the parties have made assumptions and estimates based on or related to many of these factors. Such factors include, without limitation: the timing, completion and delivery of required permits, supply arrangements and financing. Readers should not place undue reliance on the forward-looking statements and information contained in this news release concerning these times. Except as required by law, the Company does not assume any obligation to update the forward-looking statements of beliefs, opinions, projections, or other factors, should they change, except as required by law.
