

# Red Metal Resources Mobilizes Crews to Ville Marie, Quebec, Contiguous to Recent Hydrogen Discovery

13.11.2025 | [Newsfile](#)

Vancouver, November 13, 2025 - [Red Metal Resources Ltd.](#) (CSE: RMES) (OTC Pink: RMESF) (FSE: I660) ("Red Metal" or the "Company") is pleased to announce it has mobilized crews and collected UAV supported magnetic survey data over the Company's Point Piche Property in Lake Timiskaming in the Témiscamingue Graben region.

The survey is being conducted by Fladgate Exploration Consulting out of Thunder Bay, ON, using a 15-meter detailed line spacing while flying at very low elevation over the lake. Low elevation and closely spaced lines increase the resolution of the data collected. The collection of high-density magnetic data will be used to aid in a structural interpretation of bedrock under the lakebed.

The Témiscamingue Graben is a Proterozoic-Paleozoic structural corridor hosting promising lithologies for natural hydrogen accumulation in the form of ultramafic source rocks covered by dolomites and limestones as potential cap rocks. The Temiskaming Graben is an approximately 400 km long and 50 km wide depression straddling the Ontario-Quebec border in Eastern Canada. The Témiscamingue Graben is now partially filled by Lake Temiskaming. Work completed by Quebec City's Institut National de Recherche Scientifique (INRS), Quebec Innovative Material Corp (QIMC), and [Record Resources Inc.](#) (RES) recorded hydrogen anomalies in lake sampling, which has been disclosed in the news release issued by Record Resources Inc on April 7, 2025.

The Company's CEO and President, Caitlin Jeffs, commented, "The current survey represents an important step in advancing our understanding of the geological setting of this region, and we believe it strengthens our foundation as we move toward evaluating potential natural hydrogen opportunities in the Témiscamingue Graben."

About Red Metal Resources Ltd.

Red Metal Resources is a mineral exploration company focused on growth through acquiring, exploring and developing clean energy and strategic minerals projects. The Company's portfolio of projects includes seven separate mineral claim blocks and mineral claim applications, highly prospective for Hydrogen, covering 160

mineral claims and totalling over 4,178 hectares, located in Ville Marie, Quebec, and Larder Lake, Ontario, Canada. As well, the Company has a Chilean copper project, located in the prolific Candelaria iron oxide copper-gold (IOCG) belt of Chile's coastal Cordillera. Red Metal is quoted on the Canadian Securities Exchange under the symbol RMES, on OTC Link alternative trading system on the OTC Pink marketplace under the symbol RMESF and on the Frankfurt Stock Exchange under the symbol I660.
