

The Canadian Chrome Company Inc. Provides Update on Trading Activity and Corporate Developments

13.11.2025 | [Newsfile](#)

Toronto, November 13, 2025 - [The Canadian Chrome Company Inc.](#) (CSE: CACR) (CSE: CACR.A), formerly KWG Resources Inc. (the "Company") announces that in light of heightened trading volumes in our shares and ongoing public interest in the Ring of Fire region, (thanks to World Series Commercials) we wish to give our shareholders the following update:

The Company is not aware of any specific initiatives or plans that would explain the recent increase in trading activity of its shares.

Our management team is focused on advancing the Company's strategic objectives to the advantage of all shareholders. However, securities regulations, including National Instrument 43-101, strictly limit the nature and timing of disclosures we can make.

CCC has recently entered into several non-disclosure agreements with third parties. These agreements permit discussions that we believe hold meaningful potential. We will provide further details as soon as we are legally and practically able to do so.

As well, the Company announces that a warrant previously held by its CEO to acquire treasury shares (expiring December 31, 2025) has been exercised ahead of schedule, providing immediate working capital. Terms for a related non-arm's length private placement are also in the final stages of negotiation and will be disclosed upon completion.

We want to tell our partners, our shareholders, that we understand that the limited nature of the information we can share with them is frustrating. This limitation does not reflect the value that we place on their loyalty and their patience.

About The Canadian Chrome Company Inc.

The Canadian Chrome Company Inc. is an exploration stage company that is focused on identification, acquisition, consolidation, exploration, development and evaluation of large-scale deposits of minerals including chromite in the Ring of Fire, as well as other base metals and strategic minerals and, where applicable, in the development of transportation and electrification links to access remote areas where these deposits may be located.
