

Questerre updates PX Energy transaction

06.01.2026 | [GlobeNewswire](#)

CALGARY, Jan. 05, 2026 - [Questerre Energy Corp.](#) ("Questerre" or the "Company") (TSX,OSE:QEC) reported today the term sheet for a 50/50 joint venture to develop Parana Xisto SA ("PX Energy") with a local Brazilian partner has expired in accordance with its terms.

Questerre remains the 100% owner and operator of PX Energy, an oil shale production and refining company based in southern Brazil. As a result, the Company's financial and operating results for the quarter and period ending December 31, 2025, will include the full consolidation of PX Energy.

The Company further reported that production at PX Energy continues to remain above 4,400 barrels of oil equivalent per day. The Company anticipates total production in the fourth quarter of the year, including its production from Western Canada, is estimated to average between 6,500 and 7,000 barrels of oil equivalent per day, reflecting continued operational momentum and stable field performance.

Questerre is an energy technology and innovation company. It is leveraging its expertise gained through early exposure to low permeability reservoirs to acquire significant high-quality resources. We believe we can successfully transition our energy portfolio.

Questerre is a believer that the future success of the energy industry depends on a balance of economics, environment, and society. We are committed to being transparent and are respectful that the public must be part of making the important choices for our energy future.

Advisory Regarding Forward-Looking Statements

This news release contains certain statements which constitute forward-looking statements or information ("forward-looking statements") within the meaning of applicable securities laws in Canada. Any statements about Questerre's expectations, beliefs, plans, goals, targets, predictions, forecasts, objectives, assumptions, information and statements about possible future events, conditions and results of operations or performance are not historical facts and may be forward-looking. Forward-looking information is often, but not always, made through the use of words or phrases such as "anticipates", "aims", "strives", "seeks", "believes", "can", "could", "may", "predicts", "potential", "should", "will", "estimates", "plans", "mileposts", "projects", "continuing", "ongoing", "expects", "intends" and similar words or phrases suggesting future outcomes. Forward-looking information in this news release includes but is not limited to the Company's estimated production for the fourth quarter of 2025.

Although Questerre believes that the expectations reflected in these forward-looking statements are reasonable, undue reliance should not be placed on them because Questerre can give no assurance that they will prove to be correct. Since forward-looking statements address future events and conditions, by their very nature they involve inherent risks and uncertainties. Current conditions, economic and otherwise, render assumptions, although reasonable when made, subject to greater uncertainty. Undue reliance should not be placed on forward-looking information as actual results may differ materially from those expressed or implied by forward-looking information.

Events or circumstances may cause actual results to differ materially from those predicted as a result of numerous known and unknown risks, uncertainties, and other factors, many of which are beyond the control of the Company, including, without limitation: the following risk factors: additional funding requirements; exploration, development, and production risks; volatility in the oil and gas industry; prices, markets, and marketing of crude oil and natural gas; liquidity and the company's substantial capital requirements; prices, markets, and marketing of crude oil and natural gas; political uncertainty; non-government organizations; changing investor sentiment; global financial market volatility; adverse economic conditions; alternatives to and changing demand for petroleum products; environmental risks; regulatory risks; inability of management

to execute its business plan; competition from other issuers; expiration of licenses and leases; Indigenous claims; possible failure to realize anticipated benefits of acquisitions; and reputational risks.

Additional information regarding some of these risks, expectations or assumptions and other risk factors may be found in the Company's Annual Information Form for the year ended December 31, 2024, and other documents available on the Company's profile at www.sedarplus.ca. Readers are cautioned not to place undue reliance on these forward-looking statements. The forward-looking statements contained in this news release are made as of the date hereof and Questerre undertakes no obligations to update publicly or revise any forward-looking statements, whether as a result of new information, future events or otherwise, unless so required by applicable securities laws.

Barrel of oil equivalent ("boe") amounts may be misleading, particularly if used in isolation. A boe conversion ratio has been calculated using a conversion rate of six thousand cubic feet of natural gas to one barrel of oil and the conversion ratio of one barrel to six thousand cubic feet is based on an energy equivalent conversion method application at the burner tip and does not necessarily represent an economic value equivalent at the wellhead. Given that the value ratio based on the current price of crude oil as compared to natural gas is significantly different from the energy equivalent of 6:1, utilizing a conversion on a 6:1 basis may be misleading as an indication of value.

This news release is not for publication or distribution, directly or indirectly, in or into the United States. This news release is not an offer of securities for sale in the United States. Securities may not be offered or sold in the United States or to or for the account or benefit of US persons (as such terms are defined in Regulation S under the United States Securities Act of 1933, as amended (the "U.S. Securities Act")), absent registration or an exemption from registration. The securities referred to herein have not been and will not be registered under the U.S. Securities Act or any state securities laws and, therefore, may not be offered for sale in the United States, except in transactions exempt from registration under the U.S. Securities Act and applicable state securities laws. No public offering of securities is being made in the United States. This news release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of the securities in any State in which such offer, solicitation or sale would be unlawful.
