

Trident Resources Commences 10,000 Metre Winter Drilling Program at the Contact Lake Gold Project in the La Ronge Gold Belt of Saskatchewan

15.01.2026 | [GloboNewsWire Europe](#)

Vancouver, Jan. 15, 2026 - [Trident Resources Corp.](#) (TSX-V: ROCK) (OTCQB: TRDTF) ("Trident" or the "Company") is pleased to announce the commencement of its 10,000 metre winter diamond drilling program at the Company's Contact Lake Gold Project, located in the prolific La Ronge Gold Belt of northern Saskatchewan. The drill program has been designed to confirm historical gold mineralization, expand known gold zones, and test newly defined targets based on current geologic interpretations.

Trident's Regional Project Location Map:

<https://www.tridentresourcescorp.com/projects/contact-lake-gold-project/#&gid=1&pid=1>

The 2026 winter drill program is an important follow-up to the recently concluded 2025 Contact Lake drill program, which successfully intersected high-grade gold intercepts and broad zones of alteration and gold mineralization. Previous to the 2025 drill program, the Contact Lake site had not been explored in nearly 30 years. Trident is excited to drill test several targets and realize the tremendous potential of one of the region's most prospective gold projects.

Contact Lake Gold Property Map:

Jon Wiesblatt, CEO of Trident Resources, commented: "Launching our winter drill program is an exciting step forward for Trident and our shareholders. This 10,000-metre program is designed to further test historical zones as well as to demonstrate the expansion potential of the gold system and make new discoveries. With gold mineralization identified historically and modern exploration techniques now being applied for the first time, we believe Contact Lake has the potential to become one of the more significant new gold projects in the La Ronge Gold Belt. Importantly, the winter drill program is fully-funded, with Trident holding more than \$12 million in cash and marketable securities on its balance sheet, providing the Company with a strong financial position to execute on its exploration plans."

Assay Results from Previously Reported Holes CL25001 to CL25013

Drill Hole #	From (m)	To (m)	Width (m)	Au (g/t)	Gram-Metre (gm)
CL25001	41.50	71.00	29.50	0.56	16.60

Program Overview:

The drill program will consist of an approximate 10,000 metres in up to 40 drill holes that will target high-priority zones identified through structural mapping, geophysical surveys, and reviews of historical data. Drilling is expected to take place on both land and ice-based locations at the Contact Lake target area, as well as several land-based holes at the adjacent Preview SW deposit. Drill program personnel and equipment are being mobilized to the Contact Lake project with drilling to begin shortly.
