

Steadright Critical Minerals Inc. Announces Titanbeach One 43-101 Initial Technical Report

20.01.2026 | [The Newswire](#)

[Steadright Critical Minerals Inc.](#) (CSE: SCM) ("Steadright" or the "Company"), a resource exploration company focused on near-term production announces that the technical report (43-101) for TitanBeach One (1) in Morocco has been filed on Sedar. The work was done by Quebec-based firm, ABG Exploration Inc.

An NI 43-101 Technical Report is a formal, summary document required by Canadian securities Regulators for public disclosure of scientific and technical information about a mining company's mineral projects. It ensures transparency and protects investors by detailing exploration, development, and production data, all presented in a standardized format. Once the submission made by Steadright has been reviewed it will be released. "The company has filed the NI 43-101 report supporting the results previously announced on September 16th, 2025 and there are no material differences."

The Company is also waiting for their Environmental and Mining License in the quite near future on TitanBeach One, where the initial assays resulted in the following:

"Heavy Mineral beach sand samples reveal the existence of potential ilmenite, titanomagnetite, magnetite, leucoxene and rutile bearing sands with Fe₂O₃ values of up to 79.5% and TiO₂ as high as 14.9%." (Press release September 16th, 2025)

The extended technical report into the sand dunes and on Beach Two did not materialize, as the company is still waiting on results from late November and early December 2025 from the last exploration program. As such, Steadright has decided to move things forward by focusing on TitanBeach One and the application for the mining license, which was applied for at the end of 2025.

Steadright CEO, Matt Lewis, states, "We are a company that does what we say we will do. When it comes to TitanBeach, that's a promise made - and a promise kept."

"The Canadian and Moroccan team have our noses to the grindstone and will be moving forward on the titanium sands as fast as is doable."

ABOUT STEADRIGHT CRITICAL MINERALS INC.

Steadright Critical Minerals Inc. is a mineral exploration company established in 2019. Steadright has been focused in 2025 on finding exploration and historical mining projects that can be brought into production within the Moroccan critical mineral space. Steadright currently has exposure through a Moroccan entity known as NSM Capital Sarl, with over 192 sq KM's of mineral exploration claims called the TitanBeach Titanium Project, and found in the Southern Provinces of Morocco. Steadright has also recently signed an MOU for the historic Goundafa Mine within the Kingdom of Morocco.
