(1) This is a non-IFRS measure and is not a standardized financial measure. The Company's method of calculating such financial measures may differ from the methods used by other issuers and, accordingly, the definition of these non-IFRS financial measures may not be comparable to similar measures presented by other issuers. Refer to "Reconciliation of Non-IFRS financial measures" on page 3 of this news release for more information about each non-IFRS measure and for the reconciliations to the most directly comparable IFRS financial measures.

"As expected, our results for the quarter reflect the full resumption of certain projects that were temporarily delayed from North America and South America, and the continued ramp-up of new drilling projects in Canada. Our overall level of drilling activity increased over quarter, with a higher proportion of specialized drilling. Our quarter over quarter revenue increased despite unexpected delays from a drilling project and drilling program modifications in South America. Competitive pricing on new contracts and contract renewals remained during the quarter," said Daniel Maheu, President and CEO of Orbit Garant. "The level of demand for our drilling services from senior and intermediate mining customers in both Canada and South America is intensifying and we are seeing a definite increase in request for proposals from junior exploration companies in Canada."

"Our drill utilization rates in the quarter reached their highest level in more than two years, and supported by new drilling contracts and contract renewals, we expect further increases in our drill utilization rates in our fiscal third quarter, which we can accomplish with minimal mobilization costs. Some of these increased utilization gains may not be fully realized until our fiscal fourth quarter due to various challenges caused by the severe winter weather conditions we have experienced in Canada in January and into February," continued Mr. Maheu. "With record gold prices and historically high copper prices supporting strong customer demand for our drilling services, we are confident in our business outlook for the second half of fiscal 2026 and entering into fiscal 2027."

## Second Quarter Results

Revenue for Q2 2026 totalled \$47.9 million, an increase of 10.5% compared to \$43.5 million for the three-month period ended December 31, 2024.

31, 2024 ("Q2 2025"). Canada revenue totalled \$33.8 million in Q2 2026, an increase of 9.8% compared to \$30.8 million in Q2 2025, reflecting increased drilling activity and a higher proportion of specialized drilling activity. International revenue totalled \$12.7 million in Q2 2026, an increase of 12.1% compared to \$12.7 million in Q2 2025. The increase was attributable to increased drilling activity in Brazil and Guyana, partially offset by a customer decision to temporarily delay one project and unexpected modifications to another project. The project that was temporarily delayed by a customer decision was fully resumed in January 2026.

Gross profit for Q2 2026 was \$6.5 million, or 13.5% of revenue, compared to \$7.2 million, or 16.5% of revenue, in Q2 2025. Adjusted gross margin<sup>1</sup>, excluding depreciation expenses, was 18.5% in Q2 2026, compared to 21.5% in Q2 2025. The decrease in gross margin and adjusted gross margin<sup>1</sup> was primarily attributable to lower drilling productivity on certain projects in Canada, a competitive pricing environment on new contracts and contract renewals, and customer-initiated delays and modifications to drilling programs in South America, as discussed above, partially offset by increased overall drilling activity, including a higher proportion of specialized drilling in Canada.

General and Administrative expenses were \$4.5 million, or 9.4% of revenue, in Q2 2026, compared to \$4.4 million, or 9.1% of revenue, in Q2 2025.

Adjusted EBITDA<sup>1</sup> totalled \$5.1 million in Q2 2026 compared to \$4.5 million in Q2 2025. The increase was primarily attributable to favourable foreign exchange variation, partially offset by lower operating earnings.

Net earnings for Q2 2026 were \$1.3 million, or \$0.03 per share (diluted), compared to net earnings of \$0.5 million, or \$0.01 per share (diluted), in Q2 2025. The increase in net earnings in Q2 2026 was primarily attributable to lower income tax expenses and favourable foreign exchange variation, partially offset by lower operating earnings.

#### Liquidity and Capital Resources

The Company repaid a net amount of \$3.3 million on its Credit Facility in Q2 2026, compared to a repayment of \$2.4 million in Q2 2025. The Company's long-term debt under the Credit Facility, including the current portion, was \$16.0 million as at December 31, 2025, compared to \$14.0 million as at June 30, 2025.

On December 22, 2025, the Company entered into a sixth amended and restated credit agreement with National Bank of Canada in respect of the Credit Facility (the "Credit Agreement"). The Credit Facility consists of a \$30.0 million revolving credit facility and a \$5.0 million credit facility in the unused amount of US\$5.0 million utilized for the purposes of standby letters of credit. The Company's obligations under the US\$5.0 million credit facility are guaranteed by EDC. The Credit Facility expires on December 22, 2029.

On October 28, 2025, the Company announced that the Toronto Stock Exchange ("TSX") accepted its notice of intention to make a normal course issuer bid (the "NCIB Program") to purchase outstanding common shares of Orbit Garant on the open market in accordance with the rules of the TSX. Pursuant to the NCIB Program, Orbit Garant may purchase, from time to time, in aggregate up to 1,000,000 common shares over a 12-month period commencing on October 31, 2025, and terminating on October 30, 2026. During Q2 2025, Orbit Garant repurchased and cancelled 141,450 Common Shares at a weighted average price of \$1.29 per share pursuant to the NCIB Program. During Q2 2026, the Company issued 185,549 Common Shares as a result of options being exercised.

The Company repurchased and cancelled 68,916 Common Shares at a weighted average price of \$0.82 per share pursuant to a normal course issuer bid from October 31, 2024 to October 30, 2025.

As at February 11, 2026, Orbit Garant had 37,935,389 common shares issued and outstanding.

As at December 31, 2025, the Company's working capital totalled \$51.5 million compared to \$50.4 million as at June 30, 2025. Orbit Garant's working capital requirements are primarily related to the funding of inventory and the financing of accounts receivable.

## RECONCILIATION OF NON - IFRS FINANCIAL MEASURES

Financial data has been prepared in conformity with International Financial Reporting Standards ("IFRS"). However, certain non-IFRS financial measures used in this discussion and analysis do not have any standardized meaning under IFRS and could be calculated differently by other companies. The Company believes that certain non-IFRS financial measures, when presented in conjunction with comparable IFRS financial measures, are useful to investors and other readers because the information is an appropriate measure to evaluate the Company's operating performance. Internally, the Company uses this non-IFRS financial information as an indicator of operating performance. These measures are provided for information purposes, in addition to, and not as a substitute for, measures of performance prepared in accordance with IFRS.

**EBITDA, adjusted EBITDA and adjusted EBITDA margin:** EBITDA is defined as net earnings (loss) before interest, taxes, depreciation and amortization. Adjusted EBITDA is defined as EBITDA excluding the impact of the intangible assets, long-term receivable, net of expected credit loss. Adjusted EBITDA margin is defined as adjusted EBITDA to contract revenue.

**Adjusted gross profit and adjusted gross margin:** Adjusted gross profit is defined as gross profit excluding depreciation and equipment. Adjusted gross margin is defined as the percentage of adjusted gross profit to adjusted EBITDA and Adjusted EBITDA Margin revenue.

Management believes that EBITDA, Adjusted EBITDA and Adjusted EBITDA Margin are important measures when analyzing operating profitability, as they remove the impact of financing costs, certain non-cash items, income taxes and restructuring costs. Management considers these measures as useful and comparable benchmarks for evaluating the Company's performance. However, these measures rarely have the same capital and financing structure.

#### Adjusted Gross Profit and Adjusted Gross Margin

Although adjusted gross profit and adjusted gross margin are not recognized financial measures defined by IFRS, Management considers them to be important measures as they represent the Company's core profitability, without the impact of depreciation expense. As a result, Management believes they provide a useful and comparable benchmark for evaluating the Company's performance.
