

New Discovery of Massive Stibnite (Antimony) on Globex's Bald Hill Property

12.02.2026 | [GlobeNewswire](#)

TORONTO, Feb. 12, 2026 - [Globex Mining Enterprises Inc.](#) (GMX - Toronto Stock Exchange, G1MN - Frankfurt, Stuttgart, Berlin, Munich, Tradegate, Lang & Schwarz, LS Exchange, TTMzero, Düsseldorf and Quotrix Düsseldorf Stock Exchanges and GLBXF - OTCQX International in the US) is pleased to report that [Antimony Resources Corp.](#) (CSE-ATMY, OTCQB-ATMYF, FSE-K8JO) have announced the discovery of massive stibnite (antimony) on the now labeled Marcus (West) Zone of the Bald Hill property in New Brunswick under option from Globex. The new massive sulphide stibnite zone, now exposed over 25 metres, is thought to be separate from the principal target area of the Main Zone which has been subject to several successful drill program. The new Marcus Zone was exposed on surface by access road construction and will be easily tested by shallow drilling.

"The Antimony Resources 2026 Definition Drilling Program has commenced to delineate the mineralization of the Main Zone at Bald Hill with two drill rigs. A third rig will be added in early February. This drilling is focused on detailed sampling of the Bald Hill Main Zone over a distance of 600 metres and to a depth of 300 metres. It is thought that the proposed drill density will be sufficient to calculate a Maiden Resource for the Bald Hill Project."

Details on the new discovery and works proposed may be accessed by consulting the Antimony Resources February 3, 2026 press release by clicking here.
