

Empire Metals Limited Announces DTC Eligibility

08:15 Uhr | [ACCESS Newswire](#)

LONDON, February 26, 2026 - [Empire Metals Ltd.](#) (LON:EEE)(OTCQX:EPMLF), the AIM-quoted and OTCQX-traded resource exploration and development company, is pleased to announce that its common shares are now eligible for electronic clearing and settlement in the United States through the Depository Trust Company ("DTC"). DTC eligibility is expected to simplify the process of trading and enhance liquidity of the Company's shares in the United States.

DTC eligibility streamlines the trading process, making it more efficient for investors and brokers. As a subsidiary of the Depository Trust & Clearing Corporation (DTCC), DTC handles electronic clearing and settlement for publicly traded companies. With DTC eligibility, the Company's shares can now be traded across a wider network of brokerage firms in the United States, accelerating the settlement process and improving access for a broader range of investors.

Empire trades on the OTCQX under the symbol "EPMLF".

Shaun Bunn, Managing Director, said: "Securing DTC eligibility is a significant step forward for Empire, as it simplifies trading for our U.S. investors and expands access to a broader audience. This milestone aligns with our commitment to enhancing liquidity and shareholder value, making it easier and more efficient for investors to participate in the growth of our Company."

About Empire Metals Limited

Empire Metals Ltd (AIM:EEE)(OTCQX:EPMLF) is an exploration and resource development company focused on the commercialisation of the Pitfield Titanium Project, located in Western Australia. The titanium discovery at Pitfield is of unprecedented scale and hosts one of the largest and highest-grade titanium resources reported globally, with a Mineral Resource Estimate (MRE) totalling 2.2 billion tonnes grading 5.1% TiO₂ for 113 million tonnes of contained TiO₂.

Titanium mineralisation at Pitfield occurs from surface and displays exceptional grade continuity along strike and down dip. The MRE extends across just 20% of the known mineralised footprint, providing substantial potential for further resource expansion.

Conventional processing has already produced a high-purity product grading 99.25% TiO₂, suitable for titanium sponge metal or pigment feedstock. With excellent logistics and established infrastructure, Pitfield is strategically positioned to supply the growing global demand for titanium and other critical minerals.
