About Orezone Gold Corporation

Orezone Gold Corporation (TSX: ORE | ASX: ORE | OTCQX: ORZCF) is an emerging mid-tier gold producer. Production from its Bomboré mine is forecasted to total between 170,000 and 185,000 ounces in 2026. The Company is advancing the Bomboré stage 2 hard rock expansion, which is forecasted to increase future annual production to between 220,000 and 250,000 ounces. On January 26, 2026, the Company entered into a definitive agreement to acquire Hecla Quebec Inc., which owns the operating Casa Berardi gold mine located in Quebec, Canada. Closing of the acquisition is expected in March 2026.

SUMMARY FINANCIAL PERFORMANCE OVERVIEW

The reporting period is the year ended 31 December 2025 with the corresponding reporting period being for the year ended 31 December 2024. All dollar figures are in United States dollars, and all tabular amounts are in thousands, unless stated otherwise. References to "\$", "US\$", or "USD" are to United States dollars, references to "XOF" are to West African Communauté Financière Africaine francs. Abbreviations "M" means millions, "K" means thousands, "oz" means troy ounces, and "FY" means full year.

The financial performance of Orezone for the year ended 31 December 2025 is summarized below:

	FY2025	FY2024
Revenue	\$376,624	\$283,517
Cost of sales excluding depreciation and depletion	(137,242)	(114,689)

Income tax expense	(50,960)	(20,805)
Net earnings for the year	\$77,444	\$64,084

Amounts presented above are aggregate balances of certain line items presented in the Consolidated Statement of Earnings and Comprehensive Income.

¹This is a non-GAAP measure with no standard meaning under IFRS.

Revenue

Revenue increased by 33% as compared to 2024 due to a 44% increase in the average realized gold price, partially offset by an 8% decrease in gold oz sold. The lower gold oz sold in 2025 is the result of a 7% decline in gold production from an expected decrease in ore grades.

Cost of Sales

Cost of sales excluding depreciation and depletion increased by 20% as compared to 2024 from a 7% increase in tonnes processed; a 4% appreciation of the XOF currency against the USD on local costs; and a write-down reversal of \$8.9M on long-term stockpiled ore recognized in 2024 with no such reversal in 2025.

Royalties

Royalties increased by 57% as compared to 2024 as a result of a 44% increase in the average realized gold price and higher government royalty rates enacted into law in April 2025.

EBITDA

EBITDA of \$173.6M was 35% higher than the comparative 2024 year from the increase in revenues, partially offset by the increase in cost of sales and royalties as described above; \$6.3M in higher exploration and evaluation costs as a result of the multi-year drill program at the Bomboré gold mine that commenced in late 2024; and a \$6.9M increase in other loss, primarily driven by adverse foreign exchange movements and a fair value loss on the Company's silver stream obligation from higher forecasted future silver prices.

Depreciation and Depletion

Depreciation and depletion increased 19% as compared to 2024 due to additional tonnes processed and more completed capital expenditures subject to depletion.

Finance Expense

Finance expense decreased by \$3.5M as compared to 2024 which reflects scheduled principal repayments on the Company's Phase I senior loan with Coris Bank. Borrowing costs on the Phase II senior loan used to finance the construction of the hard rock process plant were capitalized.

Income Tax Expense

Income tax expense in 2025 is attributable to earnings generated by the Bomboré mine. The higher tax expense in 2025 is the result of improved mine earnings from a significantly better realized gold price. Also, the 2024 total tax expense included a \$7.5M deferred tax recovery on the recognition of previously unrecognized tax attributes for the Bomboré mine.

LIQUIDITY SUMMARY

As of 31 December 2025, the Company had available liquidity of \$111.8M, with cash of \$97.9M and bullion inventory (3,175 oz) with a market value of \$13.9M.

2025 OPERATIONAL REVIEW

Orezone is a gold producer operating the Bomboré gold mine in Burkina Faso. In 2025, the Company advanced its transition from an oxide-only operation towards a significantly larger, integrated oxide and hard rock producer.

Gold production at the Bomboré mine in 2025 was 110,014 oz as compared to 118,746 oz in 2024. The 7%

decrease in gold production was attributable to a decline in head grades, partially offset by an increase in plant throughput.

Lower oxide grades were expected in 2025 as higher grade pits were sequenced in earlier years of the mine plan. Ore supply for the oxide plant was maintained throughout the year, with supplemental stockpiles utilized during periods of restricted access caused by seasonal rainfall.

Construction of the 2.5Mtpa stage 1 hard rock expansion was completed in 2025, with first gold announced on December 15, 2025. Mill throughput rates were successfully increased through the remainder of 2025, with commissioning grades below plan as the result of adjusted mine sequencing due to (1) pending explosive storage permit approval and (2) the intermittent availability of explosive stocks. Subsequent to year-end, commercial production was declared on the hard rock expansion on January 16, 2026.

2 BASIS OF PRESENTATION

This report is based on accounts that are being in the process of being audited.

This report does not include all the notes normally included in an Annual Financial report. Accordingly, this report is to be read in conjunction with the Company's annual consolidated financial statements for the year ended 31 December 2024 (the "2024 Annual Financial Statements") and any public announcements made by the Company during the reporting period in accordance with applicable continuous disclosure requirements.

(a) Statement of compliance

These consolidated financial statements have been prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IFRS"). The accounting policies applied in the preparation of these unaudited consolidated financial statements have been consistently applied in each of the years presented. Material accounting policies used in the presentation of these unaudited consolidated financial statements are presented in Note 3 of the Company's 2024 Annual Financial Statements.

The preliminary final report for Orezone Gold Corporation and its subsidiaries for the year ended 31 December 2025 was authorized for issue by the Board of Directors on 28 February 2026.

(b) Basis of measurement

These financial statements have been prepared on a historical cost basis, except for certain financial assets and liabilities that are measured at fair value as disclosed elsewhere in the notes to the financial statements.

The preparation of consolidated financial statements in accordance with IFRS requires management to make estimates and judgments that may have a significant impact to the financial statements. Estimates are continuously evaluated and are based on management's experience and expectations of future events that are believed to be reasonable under the circumstances. Actual outcomes may differ from these estimates. The Company's critical accounting judgments and estimates are presented in Note 4 of the Company's 2024 Annual Financial Statements.

These financial statements have been prepared on the accounting basis that the Company is a going concern which assumes the Company will continue to operate in the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business.

The Company has one operating segment, being the acquisition, exploration, development and operation of precious metal properties.

These financial statements are presented in United States dollars, unless otherwise indicated.

Closing balance	\$10,511	\$6,222

Effective 19 August 2025, the Company amended its mining convention with the State of Burkina Faso to increase the State's free carried interest in Orezone Bomboré S.A. ("OBSA") from 10% to 15% in accordance with the new 2024 Mining Code, thereby reducing the Company's ownership interest from 90% to 85% at the same time. OBSA is the owner of the Bomboré mine.

Concurrently, OBSA declared a dividend to its members in an amount equal to its accumulated earnings to 31 December 2024 as measured under OHADA accounting principles. The State's share of this dividend was XOF 7.4 billion (\$13.2 million) which was subsequently paid by OBSA to the State on 25 August 2025.

Given the increase in the State's free carried interest was a transaction that resulted in changes in ownership but with no changes in control, it was accounted for as transactions with equity holders in their capacity as equity holders. As a result, no gain or loss was recognised in profit or loss, and instead it was recognised entirely in equity as a transfer between accumulated deficit and non-controlling interest. No other adjustments to equity took place given no consideration was exchanged in relation to the transfer of shares.

12 SUBSEQUENT EVENTS

(a) Stage I Hard Rock Expansion Commercial Production

On 15 January 2026, the Company's hard rock expansion at the Bomboré gold mine achieved commercial production.

(b) Acquisition of Casa Berardi Gold Mine

On 26 January 2026 the Company entered into a definitive agreement (the "Agreement") to acquire (the "Transaction") Hecla Quebec Inc. ("Hecla Quebec"), a wholly owned subsidiary of [Hecla Mining Company](#) ("Hecla Mining"). Hecla Quebec owns a 100% interest in the Casa Berardi gold mine and a portfolio of exploration projects, located in Quebec, Canada. Orezone anticipates closing of the Transaction will occur in the first quarter of 2026.

Pursuant to the Agreement, Orezone has agreed to pay Hecla Mining \$272 million on closing in cash and

Orezone common shares, \$80 million in deferred consideration, and \$241 million in contingent consideration.

In connection with this Transaction, Orezone entered into an agreement for a \$100 million gold purchase and sale agreement ("Gold Stream") with Franco-Neveda Corporation ("Franco-Nevada") which will close concurrently with the Transaction. Under the terms of the Gold Stream, Orezone will make fixed quarterly deliveries of 1,625 gold oz from 2026 to 2030, after which the stream percentage will be 5.0% of future gold production. Orezone will receive a cash payment equal to 20% of the spot gold price for each oz delivered.

FORWARD LOOKING STATEMENTS

This Appendix 4E refers to and contains certain forward-looking statements and information ("forward-looking statements") relating, but not limited to, the Company's expectations, intentions, plans, and beliefs. Forward-looking statements can often be identified by forward-looking words such as "anticipate", "believe", "expect", "goal", "plan", "intend", "estimate", "may" and "will" or similar words suggesting future outcomes, or other expectations, beliefs, plans, objectives, assumptions, intentions or statements about future events or performance.

All such forward-looking statements are based on certain assumptions and analyses made by management in light of their experience and perception of historical trends, current conditions and expected future developments, as well as other factors management believe are appropriate in the circumstances.

These forward-looking statements, however, are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking statements including, but not limited to, unexpected changes in laws, rules or regulations, or their enforcement by applicable authorities; the failure of parties to contracts to perform as agreed; social or labour unrest; changes in commodity prices; unexpected failure or inadequacy of infrastructure, the failure of exploration programs, including drilling programs, to deliver anticipated results and the failure of ongoing and contemplated studies to deliver anticipated results or results that would justify and support continued studies, development or operations. Other factors that could cause actual results to differ materially from any forward-looking statement include, but are not limited to, failure to establish estimated resources and reserves, the grade and recovery of material which is mined varying from estimates, capital and operating costs varying significantly from estimates, delays in obtaining or failures to obtain required governmental, environmental or other project approvals, inflation, changes in exchange rates, delays in the development of projects, unexpected increases in budgeted costs and expenditures, and other factors.

Members (both current and potential) are cautioned not to place undue reliance on forward-looking statements. By its nature, forward-looking statements involve numerous assumptions, inherent risks, and uncertainties, both general and specific, that contribute to the possibility that the predictions, forecasts, projections, and various future events will not occur.

The Company undertakes no obligation to update publicly or otherwise revise any forward-looking information whether as a result of new information, future events or other such factors which affect this information, except as required by law.
