13.03.2026 | [ACCESS Newswire](#)

[Tocvan Ventures Corp.](#) (the "Company" or "Tocvan") (CSE:TOC) (OTCQB:TCVNF) (WKN: TV3/ A2PE64) is pleased to announce a strategic partnership with VRIFY Technology Inc. ("VRIFY"), a global leader in artificial intelligence software for mineral exploration. The collaboration will see Tocvan integrate VRIFY Predict, specifically DORA, an AI prospectivity mapping software, to generate and prioritize new high-confidence exploration targets at its flagship Pilar Gold-Silver Project in Sonora, Mexico.

By combining VRIFY's advanced AI capabilities with Tocvan's comprehensive dataset, built from extensive drilling, surface geochemistry, and geophysical surveys, the Company expects to streamline target ranking and accelerate discovery across its large, district-scale land position. Alongside VRIFY Predict, the Company will utilize VRIFY Present, another offering of the Exploration Intelligence Software, to highlight AI-generated targets, support clearer technical analysis, and create compelling stakeholder communications.

"Gran Pilar has delivered consistent positive results, and we're excited to apply next-generation AI to unlock even greater potential," said Brodie A. Sutherland, CEO of Tocvan. "Our team has invested years in building a high-quality geological foundation. Partnering with VRIFY will help us extract maximum insight from that data, focus our resources on the strongest opportunities, and move the project forward more efficiently for the benefit of our shareholders."

Steve de Jong, CEO of VRIFY, commented: "Tocvan represents the ideal partner for VRIFY's Exploration Intelligence Software - their team is technically strong, and coupled with a data-rich project in a premier jurisdiction, we expect our software will add massive value to their exploration approach. We look forward to supporting them as they leverage AI, through DORA, to drive meaningful new discoveries at Gran Pilar."

This initiative underscores Tocvan's proactive approach to modern exploration, blending proven fieldwork with innovative technology to maximize discovery potential and deliver long-term value in one of Mexico's most prolific mining regions.

Quality Assurance / Quality Control

Rock and Drill samples were shipped for sample preparation to ALS Limited in Hermosillo, Sonora, Mexico and for analysis at the ALS laboratory in North Vancouver. The ALS Hermosillo and North Vancouver facilities are ISO 9001 and ISO/IEC 17025 certified. Gold was analyzed using 50-gram nominal weight fire assay with atomic absorption spectroscopy finish. Over limits for gold (>10 g/t), were analyzed using fire assay with a gravimetric finish. Silver and other elements were analyzed using a four-acid digestion with an ICP finish. Over limit analyses for silver (>100 g/t) were re-assayed using an ore-grade four-acid digestion with ICP-AES finish. Control samples comprising certified reference samples and blank samples were systematically inserted into the sample stream and analyzed as part of the Company's robust quality assurance / quality control protocol.

The ALS Hermosillo and North Vancouver facilities are ISO 9001 and ISO/IEC 17025 certified. Gold and multi-element analysis of soils was completed by aqua regia digestion and ICP-MS finish using a 50-gram nominal weight. Over limit gold values greater than 1 g/t were re-assayed with a more robust aqua regia digestion and ICP-MS finish.
