

EQS-News: Drill Success in Sonora: Algo Grande Reports Up to 3.9% Copper Equivalent

10:00 Uhr | [DGAP](#)

Algo Grande Copper (WKN A41UK1 / TSXV ALGR) has once again delivered strong results at the conclusion of the first drilling phase at the highly promising Adelita copper, silver, and gold project. The company, led by CEO Enric Gay, has confirmed copper equivalent grades of up to 3.9%!

Algo Grande had drilled a total of four holes totaling 1,998 meters in the Cerro Grande (skarn) target area, presenting not only convincing metal grades but also new, important data on the structure and extent of mineralization at the project in Sonora, Mexico.

The goal of confirming high-grade skarn mineralization at depth was achieved, and according to the company, the results also show that the mineralization system is more extensive than previously assumed and extends beyond the boundaries of earlier drill holes!
