

SLAM Trenching New Gold Targets Near The No. 1 Gold Vein Discovery at Jake Lee

16.04.2026 | [ACCESS Newswire](#)

Gold, Silver and Critical Elements in the Mineral-Rich Province of New Brunswick, Canada

MIRAMICHI, April 16, 2026 - [SLAM Exploration Ltd.](#) (TSXV:SXL)(OTCQB:SXLXF) ("SLAM" or the "Company") is pleased to report it has mobilizing the advance scout team and an excavator to launch the 2026 exploration campaign by testing targets along strike from the No. 1 vein where SLAM reported high grade assays up to 40.5 grams per tonne ("g/t") gold and 63.3 g/t silver from channel samples on its wholly owned Jake Lee claims. The Jake Lee project is located 25 kilometers southeast of the Clarence Stream gold deposit operated by [Galway Metals Inc.](#) in New Brunswick, Canada.

Targets include gold soil anomalies ranging up to 0.466 g/t gold reported March 2, 2026, as well as airborne conductors and aeromagnetic anomalies trending northeast of the No. 1 gold vein where SLAM reported channel samples grading up to 40.5 g/t gold and 63.30 g/t silver over 0.40 meters as announced January 14, 2026. The Company expects to follow with a drilling program to test beneath selected targets including the No. 1 gold vein.

Figure 1: The No. 1 Gold Vein

The Jake Lee claims are located 25 kilometers southeast of the Clarence Stream gold deposit where Galway Metals Inc. Clarence Stream is host to a 12.4M tonne indicated resource of 922,000 ounces at a grade of 2.31 g/t gold plus an inferred resource of 16.1m tonnes with 1,334,000 ounces at a grade of 2.60 g/t gold. (Reference: "Updated Mineral Resource Statement, Clarence Stream Deposits, New Brunswick, Canada, by SLR Consulting (Canada) Ltd., March 31, 2022").

QA-QC Procedures: The assay results discussed above were previously reported by the Company in News Releases as specified. Reference is also made to airborne surveys by previous workers as documented in NBDNRE Assessment Reports.

About SLAM Exploration Ltd: SLAM Exploration Ltd. is a publicly listed resource company with a 40,000-hectare portfolio of mineral claim holdings in the mineral-rich province of New Brunswick. This portfolio is built around the Goodwin Copper Nickel Cobalt project in the Bathurst Mining Camp ("BMC") of New Brunswick. The Company drilled 10 holes in the 2025 diamond drilling campaign on the Goodwin copper-nickel-cobalt project. This followed significant copper, nickel and cobalt intercepts from 15 diamond drill holes reported by the Company in 2024. These include a 64.90 meter core interval, grading 2.19% Cu-Eq (copper-nickel-cobalt), including 3.84% Cu-Eq over a 31.20 meter core interval from hole GW24-02 as reported in a news release August 7, 2024. Significant gold values were also reported with up to 3.31 grams per tonne over 0.5m in hole GW24-01.

SLAM reported an expansion of the soil coverage on the Menneval gold project on January 7, 2026. A gold soil anomaly extends approximately 3,000 meters by 2,500 meters with gold-bearing samples ranging from 0.005 grams per tonne ("g/t") to 0.683 g/t gold. The results indicate potential extensions to a swarm of quartz veins previously discovered by SLAM. The Company previously reported core intervals include 3,955 g/t gold over 0.1m from the No. 18 vein (December 03, 2020), as well as 162.5 g/t gold over 0.2 m (December 13, 2021) and 56.90 g/t gold over 0.5 m (November 22, 2022) from the Maisie vein.

The Company is a project generator and expects to receive significant cash and share payments in 2026. SLAM received 1,200,000 shares plus cash from Nine Mile Metals Inc. (NINE) in 2025 pursuant to the Wedge project agreement. Also in 2025, the Company received a cash payment of \$60,000 as well as 180,000 shares of a private company pursuant to the Ramsay gold agreement. The Company holds NSR

royalties and expects to receive additional cash and share payments on the Wedge copper zinc project and on the Ramsay gold project.

Forward-Looking Statements

This news release contains "forward-looking statements" and "forward-looking information" within the meaning of applicable Canadian securities laws. Forward-looking statements are not historical facts but instead represent management's expectations, estimates and projections regarding future events or circumstances. Forward-looking statements are often, but not always, identified by words such as "expects," "plans," "anticipates," "believes," "intends," "estimates," "projects," "potential," "may," "could," "would," "might," or "will," and similar expressions.

Forward-looking statements in this news release include, but are not limited to: statements regarding the exploration potential of specified projects; the significance of historical gold occurrences; the interpretation of geological, geochemical, and geophysical data; the identification and prioritization of exploration targets; the anticipated receipt and significance of pending assay results; the continuity and extent of mineralized structures and anomalies; the timing and scope of future exploration programs; the Company's ability to advance its mineral projects; and the potential for future exploration success..

Forward-looking statements are based on reasonable assumptions made by the Company as of the date of this news release, including, without limitation: that historical exploration results, mineral occurrences, and publicly reported third-party mineral resources are relevant for regional and exploration context; that geological interpretations and targeting models are reasonable; that pending assay results will be received within anticipated timeframes; that planned exploration activities can be executed as expected; that contractors, equipment, personnel, and supplies will be available on acceptable terms; that commodity prices and market conditions will remain generally supportive; and that required permits, approvals, and access rights will be obtained in a timely manner.

Forward-looking statements involve known and unknown risks, uncertainties, and other factors that may cause actual results, performance, or achievements to differ materially from those expressed or implied by such statements. These risks and uncertainties include, without limitation: the speculative nature of mineral exploration; the risk that exploration results, including pending assay results, may not confirm historical data or current interpretations; uncertainty regarding the continuity, grade, and extent of mineralization; delays or changes to exploration programs; availability and cost of labour, equipment, and contractors; fluctuations in commodity prices; availability of financing on acceptable terms; regulatory, environmental, and permitting risks; operating hazards; and general economic, market, and business conditions. Additional risk factors are described in the Company's most recently filed Management's Discussion and Analysis and other continuous

disclosure documents available under the Company's profile on SEDAR+.

Readers are cautioned not to place undue reliance on forward-looking statements. The Company does not undertake to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable securities laws.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
