

Loyalist Exploration Limited Engages P&E Mining Consultants for Mineral Resource Estimate and PEA on the Tully Gold Project

14:45 Uhr | [The Newswire](#)

[Loyalist Exploration Ltd.](#) (CSE: PNGC) ("Loyalist" or the "Company") is pleased to announce that it has entered into a professional services agreement with P&E Mining Consultants Inc. ("P&E") to advance the Tully Gold Project, located approximately 25 km northeast of Timmins in the prolific Timmins-Porcupine Gold Camp.

Under the engagement, P&E will deliver a phased scope of work consisting of:

- Phase 1: Internal Mineral Resource Estimate
- Phase 2: NI 43-101 compliant external Mineral Resource Estimate
- Phase 3: Preliminary Economic Assessment (PEA) Technical Report

Loyalist is now complete with its internal work in preparation of this engagement with the review of the exploration database, block model, creation of level plans and preliminary mine planning concepts. This work builds on the project's historical gold mineral resource estimate* and supports Loyalist's "Buy Timmins, Mine Timmins" strategy, which focuses on consolidating and advancing high-potential assets in the Timmins Mining District toward potential development and production.

Eugene Puritch, P.Eng., FEC, CET, President of P&E Mining Consultants Inc., will lead the engagement as a Qualified Person under National Instrument 43-101 - Standards of Disclosure for Mineral Projects.

Errol Farr, President and CEO of Loyalist, commented: "We are excited to partner with P&E, a highly respected firm with extensive experience in Mineral Resource estimation and technical reporting in the Canadian and international mining sectors. This engagement represents a key milestone in advancing the Tully Gold Project. By completing an updated Mineral Resource Estimate and PEA, we aim to better define the economic potential of this high-grade gold asset and unlock value for our shareholders as we progress permitting and exploration activities in the Timmins camp."

The engagement is structured in phases, with Loyalist providing approval to proceed to each subsequent phase based on results and corporate priorities.

About the Tully Gold Project Tully Gold Project comprises a 458-hectare mining lease located in a well-established mining district with excellent infrastructure. It hosts a historical mineral resource estimate (not treated as current by Loyalist) of 107,000 ounces of gold (capped), comprising 358,000 tonnes grading 6.56 g/t Au (indicated) for 76,000 oz Au and 184,000 tonnes grading 5.17 g/t Au (inferred) for 31,000 oz Au, as estimated by Francis Minerals Ltd. and dated December 15, 2013. The estimate is not NI 43-101 compliant and has not been verified by a Qualified Person. The project features numerous high-grade gold drill intersections and is advancing toward permitting, with additional exploration planned for 2026.

*Statement Regarding Historical Mineral Resource Estimates The Tully deposit historical Mineral Resource Estimate ("MRE") is unclassified and does not comply with CIM Definition Standards on Mineral Resources and Mineral Reserves as required by NI 43-101. The MRE was taken from a report titled "Tully Deposit Mineral Resource Estimate" authored by Francis Minerals Ltd. and dated December 15, 2013. Investors are cautioned not to treat the estimate as current or rely on the estimate in making an investment decision. The MRE is included herein to provide shareholders with background on the rationale for advancing the asset. A qualified person has not done sufficient work to classify this historical MRE as current mineral resources, and

the Company is not treating this historical MRE as a current estimate. It is uncertain whether following evaluation and/or further exploration, the historical MRE will be able to be reported in accordance with NI 43-101.

*Notes to Historical Mineral Resource Estimate

1. CIM Definitions were followed for classification of Mineral Resources.
2. Mineral Resources are estimated at a cut-off grade of 2.5 g/t Au.
3. Mineral Resources are estimated at a gold price of \$1,510/oz and a metallurgical recovery of 92%.
4. High-grade assays are capped at 70 g/t Au.
5. Bulk density of 2.71 t/m³ was used.
6. Numbers may not add due to rounding.

About Loyalist Loyalist is a mineral development and exploration company concentrating on acquiring, exploring, and developing quality mineral properties in Canada. The Company is focused on its "Buy Timmins, Mine Timmins" strategy, comprising the Tully Gold Property, the Loveland nickel-copper-gold property, the Gold Rush Gold-Silver Property, and the DeSantis Gold Property, all located in the Timmins, Ontario Mining District. The Company has commenced a significant mining permit project at Tully and will commence exploration activities on all four properties as well as expanding the Company's Timmins based property portfolio.

About P&E Mining Consultants Inc. P&E is an independent consulting firm based in Brampton, Ontario, specializing in geological and mine engineering services, including NI 43-101 Technical Reports, Mineral Resource and Reserve Estimates, and Preliminary Economic Assessments for mining projects across Canada and internationally.

Qualified Person

Curtis Ferron, P.Geol. (ON), principal geology consultant for Loyalist, who is a "Qualified Person" as defined by NI 43-101, has reviewed and approved the technical content of this press release.
