

SLAM Hires Exploration Manager To Beef up Its Exploration Team

13:23 Uhr | [ACCESS Newswire](#)

Expanding The Team To Search For Gold And Critical Minerals In New Brunswick

MIRAMICHI, April 29, 2026 - [SLAM Exploration Ltd.](#) (TSXV:SXL)(OTCQB:SXLXF) ("SLAM" or the "Company") is pleased to announce it has hired John Dinan, P.Geo. for the position of Exploration Manager to beef up its exploration team in the search for copper, nickel, cobalt, antimony and gold in the mineral-rich province of New Brunswick. SLAM is a Canadian resource company with 11 projects in a 56,000 hectare portfolio of gold and critical minerals in New Brunswick, Canada.

Having worked across Canada, Mr. Dinan brings 2 decades of experience to our exploration team. He held the position of Senior Geologist with [Teck Resources Ltd.](#) and Syncrude Canada prior to moving back to New Brunswick to work with the New Brunswick Department of Natural Resources. He holds a Bachelor of Science degree from the University of New Brunswick and is a member of the Association of Professional Engineers and Geoscientists of New Brunswick (APEGNB).

"Mr. Dinan brings a wealth of expertise to SLAM as we continue to build and advance our extensive portfolio of critical elements and gold in the mineral-rich province of New Brunswick," said Michael Taylor, CEO. "John's computer and AI skills will help guide our search for copper, nickel, cobalt, antimony, zinc and silver as well as gold in the Bathurst Mining Camp and other parts of the province."

Options Granted: SLAM's board of directors has approved the grant of incentive stock options ("Options") to employees to acquire a total of 300,000 common shares in the capital of the Company at an exercise price of \$0.08. The Options were granted pursuant to the Company's 10% rolling stock option plan (the "Plan") and are subject to the terms of the Plan and the requirements of the TSX Venture Exchange. The Options are exercisable for a three-year term and expire on April 29, 2029.

About SLAM Exploration Ltd: SLAM Exploration Ltd. is a publicly listed resource company with a 40,000-hectare portfolio of mineral claim holdings in the mineral-rich province of New Brunswick. This portfolio is built around the Goodwin Copper Nickel Cobalt project in the Bathurst Mining Camp ("BMC") of New Brunswick. The Company drilled 10 holes in the 2025 diamond drilling campaign on the Goodwin copper-nickel-cobalt project. This followed significant copper, nickel and cobalt intercepts from 15 diamond drill holes reported by the Company in 2024. These include a 64.90 meter core interval, grading 2.19% Cu-Eq (copper-nickel-cobalt), including 3.84% Cu-Eq over a 31.20 meter core interval from hole GW24-02 as reported in a news release August 7, 2024. Significant gold values were also reported with up to 3.31 grams per tonne over 0.5m in hole GW24-01.

The Company is trenching gold soil targets with gold grading up to 0.464 g/t gold to the east and north of the No. 1 gold vein discovered by SLAM at Jake Lee in 2025. SLAM reported channel samples grading up to 40.5 g/t gold and 63.30 g/t silver from the new vein on January 14, 2026. The Jake Lee claims are located 25 kilometers southeast of the Clarence Stream gold deposit where [Galway Metals Inc.](#) Clarence Stream is host to a 12.4M tonne indicated resource of 922,000 ounces at a grade of 2.31 g/t gold plus an inferred resource of 16.1m tonnes with 1,334,000 ounces at a grade of 2.60 g/t gold. (Reference: "Updated Mineral Resource Statement, Clarence Stream Deposits, New Brunswick, Canada, by SLR Consulting (Canada) Ltd., March 31, 2022").

The Company reported an expansion of the soil coverage on the Menneval gold project on January 7, 2026. A gold soil anomaly extends approximately 3,000 meters by 2,500 meters with gold-bearing samples ranging from 0.005 grams per tonne ("g/t") to 0.683 g/t gold. The results indicate potential extensions to a swarm of quartz veins previously discovered by SLAM. The Company previously reported core intervals include 3,955 g/t gold over 0.1m from the No. 18 vein (December 03, 2020), as well as 162.5 g/t gold over 0.2 m

(December 13, 2021) and 56.90 g/t gold over 0.5 m (November 22, 2022) from the Maisie vein.

The Company is a project generator and expects to receive significant cash and share payments in 2026. SLAM received 1,200,000 shares plus cash from Nine Mile Metals Inc. (NINE) in 2025 pursuant to the Wedge project agreement. Also in 2025, the Company received a cash payment of \$60,000 as well as 180,000 shares of a private company pursuant to the Ramsay gold agreement. The Company holds NSR royalties and expects to receive additional cash and share payments on the Wedge copper zinc project and on the Ramsay gold project.

Forward-Looking Statements

This news release contains "forward-looking statements" and "forward-looking information" within the meaning of applicable Canadian securities laws (collectively, "forward-looking statements"). Forward-looking statements are not historical facts and are generally, but not always, identified by words such as "expects," "plans," "anticipates," "believes," "intends," "estimates," "projects," "potential," "may," "could," "would," "might," "will," and similar expressions.

Forward-looking statements in this news release include, without limitation, statements regarding: the planned diamond drilling and follow-up exploration in connection with the Company's recent gold discoveries at Jake Lee and Menneval. the advancement and development of the Goodwin Copper Nickel Cobalt project and the Company's plans to increase its visibility and accessibility to the U.S. investment community;

Forward-looking statements are based on a number of assumptions believed by the Company to be reasonable as of the date of this news release, including, without limitation: that the Company will be able to advance its projects as currently contemplated; that planned exploration activities, including diamond drilling, can be carried out as anticipated; that required contractors, equipment, personnel, permits and financing will be available on reasonable terms; that DTC eligibility and the OTCQB quotation will provide the expected benefits to the Company and its shareholder and that general business, market and economic conditions will remain supportive.

Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements to differ materially from those expressed or implied by such forward-looking statements. These risks and uncertainties include, without limitation: risks relating to the Company's ability to advance and develop its mineral projects; the speculative nature of mineral exploration and development; uncertainty regarding exploration results and the continuity, grade and extent of mineralization; delays or changes in planned exploration programs; the availability and cost of labour, equipment, contractors, financing and regulatory approvals; commodity price fluctuations; that DTC eligibility and the OTCQB listing may not result in increased liquidity, broadened investor participation or any other anticipated benefits; fluctuations in the market price or trading volume of the Company's securities; and

general economic, market, industry and business conditions.

Readers are cautioned not to place undue reliance on forward-looking statements. Although the Company believes that the expectations reflected in such forward-looking statements are reasonable, there can be no assurance that such expectations will prove to be correct, and actual results and future events could differ materially from those anticipated in such statements. The Company undertakes no obligation to update or revise any forward-looking statements, except as required by applicable law.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
