

Golden Rapture Mining Reports Encouraging Visual Results at its Northern Queen Mine Project with Assay Results Pending - Dryden Area

13:30 Uhr | [Newsfile](#)

Edmonton, May 5, 2026 - [Golden Rapture Mining Corp.](#) (CSE: GLDR) is pleased to announce the successful completion of its first prospecting and sampling program at the Northern Queen Mine Project near Dryden, Ontario. The exploration work is a follow-up to last month's high-resolution, low-altitude drone magnetic survey results, which identified strong and well-defined clusters of magnetic anomalies across the property.

During the program, the exploration team collected rock samples from areas surrounding the historical shaft and from the central portion of the property, where the drone magnetic survey identified strong magnetic responses.

Company President Richard Rivet commented, "We are very excited to have located the 120-year-old shaft and to have identified broad mineralized zones that also align with the strong magnetic anomalies identified by the survey. Early visual examination of the collected samples indicates substantial mineralization not only within the quartz veins but also throughout the surrounding host rocks."

The Northern Queen Mine produced Gold and Silver between 1897 and 1899. This 3500-acre property covers roughly 10 kms of strike length of highly prospective geology. It lies along the Southern boundary of the NexGold Goliath Gold Deposit, with the Eastern part bordering the Dryden Gold claims. Golden Rapture Mining holds 100% ownership.

All samples have been sent to AGAT Laboratories in Thunder Bay for analysis, with sample results also pending from our Swell Bay patented claims near Fort Frances and our Bully Boy Mine patented mineral claims near Nestor Falls, Ontario.

Encouraging Visuals

Included are pictures of some of the samples from our Northern Queen Mine Property

Forward-looking statements include predictions, projections, and forecasts and are often, but not always, identified by the use of words such as "seek", "anticipate", "believe", "plan", "estimate", "forecast", "expect", "potential", "project", "target", "schedule", "budget" and "intend" and statements that an event or result "may", "will", "should", "could" or "might" occur or be achieved and other similar expressions and includes the negatives thereof. All statements other than statements of historical fact included in this release, including, without limitation, statements regarding the Company's planned exploration programs and drill programs and potential significance of results are forward-looking statements that involve various risks and uncertainties. There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Forward-looking statements are based on a number of material factors and assumptions. Important factors that could cause actual results to differ materially from Company's expectations include actual exploration results, changes in project parameters as plans continue to be refined, results of future resource estimates, future metal prices, availability of capital, and financing on acceptable terms, general economic, market or business conditions, uninsured risks, regulatory changes, defects in title, availability of personnel, materials, and equipment on a timely basis, accidents or equipment breakdowns, delays in receiving government approvals, unanticipated environmental impacts on operations and costs to remedy same, and other exploration or other risks detailed herein and from time to time in the filings made by the Company with securities regulators. Although the Company has attempted to identify important factors that could cause actual actions, events, or results to differ from those described in forward-looking statements, there may be other factors that cause such actions, events, or results to differ materially from those anticipated. There can be no assurance that forward-looking statements will prove to be accurate, and accordingly, readers are cautioned not to place undue reliance on forward-looking statements.
