

Gamma Resources Appoints Connor Messler as President

13:00 Uhr | [ACCESS Newswire](#)

VANCOUVER, May 7, 2026 - [Gamma Resources Ltd.](#) (TSXV:GAMA)(OTCQB:GAMXF)(FRA:MRD0) ("Gamma" or the "Company") is pleased to announce the appointment of Connor Messler as President of the Company, effective immediately.

Mr. Messler is a mining professional with over 15 years of experience spanning exploration and project management. Most recently, he served as Exploration Manager at [Titan Mining Corp.](#), where he led exploration programs at the Empire State Mine in New York. This included the evaluation of extensive historical datasets, program design and management, and community outreach. He is credited with the discovery and delineation of the Kilbourne Graphite Deposit.

Mr. Messler brings a broad technical background to Gamma's team, across varying commodities and jurisdictions. Within the United States, he has designed, permitted, and lead exploration programs within the framework of Federal and State regulatory agencies. This includes properties on Bureau of Land Management and United States Forest Service land in Alaska and Idaho.

His appointment comes at a key stage in Gamma's growth as the Company advances its U.S.-focused uranium portfolio, including the Green River Project in Utah and the Mesa Arc Project in New Mexico, while continuing to prioritize transparent engagement with local stakeholders.

Gabriel Alonso-Mendoza, CEO and Director of Gamma, commented: "Connor brings a strong technical background and experience managing exploration programs that aligns well with Gamma's next phase of development. As we advance our U.S. uranium assets, his experience will support both disciplined project execution and meaningful engagement with the communities in which we operate, alongside the investment community."

In his role as President, Mr. Messler will focus on advancing the Company's exploration strategy, supporting project development, and strengthening engagement with both the investment community and local stakeholders, drawing on his experience managing exploration programs and evaluating development opportunities.

About Gamma Resources Ltd.

Gamma Resources Ltd. is a U.S.-focused uranium exploration and development company advancing high-quality assets in the Mountain West region. The Company's portfolio includes the Green River Project in Utah, comprising 1,100 acres near prominent regional producers, and the Mesa Arc Project in New Mexico, a strategic land position now totaling 4,520 acres that includes historic uranium resources in the Chama Basin. Management believes the Company is uniquely positioned to benefit from the unprecedented policy and market tailwinds reshaping the U.S. nuclear landscape, and help meet this demand with responsibly sourced, U.S.-based uranium supply.

Gamma trades on the Toronto Venture Exchange (TSX-V:GAMA), OTC (OTCQB:GAMXF) and Frankfurt (FRA:MRD0).
