

Atomic Eagle Ltd: Commenced Trading on OTCQX and Positions for U.S. Nuclear Renaissance

02:18 Uhr | [ABN Newswire](#)

Perth, Australia - [Atomic Eagle Ltd.](#) (ASX:AEU) (OTCQX:AEUXF) (FRA:6QZ0) is pleased to announce that it has upgraded its U.S. trading platform from the OTCQB Venture Market to the OTCQX Best Market, and has commenced trading on OTCQX under the ticker "AEUXF". U.S. investors can find current financial disclosure and Real-Time Level 2 quotes for the company on www.otcmarkets.com.

The Company will continue to trade on the Australian Securities Exchange under the code AEU.

Highlights

- Upgraded to the OTCQX(R) Best Market from the OTCQB(R) Venture Market.
- Now trading on OTCQX under ticker "AEUXF".
- Upgrade reflects enhanced financial standards, governance and disclosure compliance.
- Strengthens access to U.S. institutional capital and specialist uranium investors.
- Occurs amid accelerating U.S. nuclear policy support and uranium demand growth.
- U.S. Government initiatives include:
 - o Expansion of domestic nuclear capacity to ~400 GW by 2050.
 - o Rebuild of domestic uranium supply chains and enrichment capability.
 - o Funding support for SMRs and advanced reactors including recent US\$94M DOE program (May 2026).
- Positions Atomic Eagle to capitalise on a multi-decade uranium supply deficit and contracting cycle.

Atomic Eagle CEO, Phil Hoskins, commented:

"Our upgrade to OTCQX represents a significant step for Atomic Eagle, providing direct access to U.S. investors at a time when nuclear energy is undergoing a structural resurgence.

Recent U.S. Government actions to expand nuclear capacity, rebuild domestic fuel supply chains, and accelerate deployment of small modular reactors reinforce our view that uranium markets are entering a sustained period of growth.

With the advanced Muntanga Uranium Project in a stable jurisdiction like Zambia, Atomic Eagle is well positioned to benefit from these trends."

Strategic Rationale

The OTCQX quotation represents a key milestone in the Company's capital markets strategy, enhancing:

- Access to the world's largest pool of capital.
- Visibility with North American uranium and nuclear investors.
- Liquidity and trading efficiency for U.S.-based shareholders.

The OTCQX Market is designed for established, investor-focused U.S. and international companies. To qualify for OTCQX, companies must meet high financial standards, follow best practice corporate governance, and demonstrate compliance with applicable securities laws. Graduating to the OTCQX Market from the OTCQB Market marks an important milestone for companies, enabling them to demonstrate their qualifications and build visibility among U.S. investors.

The U.S. is emerging as a primary driver of uranium demand growth, underpinned by a significant shift in federal energy policy toward nuclear power. Nuclear has been recognised as essential for grid reliability, AI and data centre power demand and energy security.

About OTC Markets Group Inc.

OTC Markets Group Inc. (OTCMKTS:OTCM) operates regulated markets for trading 12,000 U.S. and international securities. Our data-driven disclosure standards form the foundation of our public markets: OTCQX(R) Best Market, OTCQB(R) Venture Market, OTCIDTM Basic Market and Pink LimitedTM Market. About Atomic Eagle Ltd:

Atomic Eagle Ltd (ASX:AEU) (OTCMKTS:AEUXF) (FRA:6QZ0) is a uranium explorer / developer advancing the Muntanga Project in Zambia, located within one of the largest and least explored sandstone-hosted uranium basins in the world.

With proven industry expertise, a strong balance sheet, and a clear mandate, the company is rising to become an emerging supplier of nuclear fuel in the global clean energy transition. Backed by strong shareholder support and significant exploration potential, Atomic Eagle is positioned to deliver growth and play a vital role in the future of nuclear power.
