Time on Monday, June 15, 2026.

About International Battery Metals Ltd.

IBAT's direct lithium extraction technology is based on proprietary lithium extraction media housed in patented extraction columns. The columns are enclosed in modular, transportable skid-mounted platforms that can be transported and commissioned into production within a short time frame.

Utilizing the patented technology, the Company's focus has been on advancing the extraction of lithium chloride from lithium-rich subsurface brine and produced water facilities. The Company's unique patented technology is focused on efficient delivery of lithium chloride while minimizing environmental impact. For more information, [click here](#)
