

# QGold Launches Summer 2026 Exploration Campaign at Mine Centre

13:30 Uhr | [GlobeNewswire](#)

TORONTO, June 18, 2026 - [Q-Gold Resources Ltd.](#) ("QGold" or the "Company") is pleased to announce the launch of its summer 2026 exploration campaign at its Mine Centre project located in Ontario, Canada. The program is anticipated to include detailed field mapping of auriferous veins, systematic channel sampling and targeted diamond drilling designed to advance and expand QGold's exploration pipeline.

The field mapping program is designed to identify and prioritize gold-bearing vein systems north and south of the Foley Mine. While certain veins in the area have been previously drill-tested, the majority remain untested. QGold intends to identify, map, clear and subsequently channel-sample these veins to expand its inventory of high-priority exploration targets.

In parallel, the Company will continue to drill-test the strike and dip extensions of auriferous veins in the vicinity of the Foley Mine, where previous exploration has successfully identified gold mineralization. This work is expected to provide a stronger geological framework for follow-up drilling and target ranking across the broader Mine Centre land package.

The summer 2026 exploration campaign commenced last week with an initial field review and planning visit by Dr. Andreas Rompel, the chief operating officer and VP exploration of the Company, Jason Arnold, P.Geol. for Mine Centre, and Aaryn Hutchinson of Critical Discoveries. The site visit focused on validating priority areas, refining field protocols and preparing the program for an efficient start to summer exploration activities (Figs. 1, 2 and 3).

*"We have only scratched the surface of the Mine Centre project," said Dr. Andy Rompel. "Through detailed field mapping, delineation of new gold-bearing veins and systematic channel sampling, we believe this campaign can generate a significantly expanded pipeline of drill-ready targets. To date, we have focused on only five veins; our objective is to increase that number meaningfully as the program advances."*

Cautionary Statements

This press release contains forward-looking statements, including, but not limited to, statements regarding the Company's beliefs, plans, expectations or intentions for its summer 2026 exploration campaign at the Mine Centre project, including in respect of its scope and anticipated results. Forward-looking statements are based on management's current expectations, assumptions and beliefs and are subject to known and unknown risks, uncertainties and other factors that may cause actual results, level of activity, performance or achievements of the Company, as the case may be, to differ materially from those expressed or implied by such statements, including but not limited to general business, economic, competitive, political and social uncertainties; future mineral prices and market demand; accidents, labour disputes and shortages; and other risks of the mining industry. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers are cautioned not to place undue reliance on forward-looking statements. The Company undertakes no obligation to update or revise any forward-looking statements except as required by applicable securities laws.

NEITHER THE TSX VENTURE EXCHANGE NOR ITS REGULATION SERVICES PROVIDER (AS THAT TERM IS DEFINED IN THE POLICIES OF THE TSX VENTURE EXCHANGE) ACCEPTS RESPONSIBILITY FOR THE ADEQUACY OR ACCURACY OF THIS RELEASE.
