

# Traction Uranium Commences Airborne Radiometric Survey at the Aurora Uranium Project, Saskatchewan

14:00 Uhr | [GlobeNewswire](#)

CALGARY, June 25, 2026 - [Traction Uranium Corp.](#) (CSE: TRAC) (OTC: TRCTF) (FRA: Z1K) (the "Company" or "Traction") is pleased to announce that the planned airborne radiometric survey has commenced at the Aurora Uranium Project ("Aurora" or the "Project"), located in Saskatchewan's Athabasca Basin region. Traction holds an option to acquire an 80% interest in Aurora from [Cosa Resources Corp.](#) ("Cosa"), subject to satisfying certain earn-in requirements (please see news release dated February 11, 2026). The Aurora Project covers approximately 17 kilometers of prospective strike along the southeastern margin of the Athabasca Basin.

The airborne radiometric survey is being completed to evaluate radiometric responses across the Project and to support the prioritization of target areas for future exploration. The survey is expected to provide important dataset for refining exploration planning at Aurora, including the identification of areas for future ground follow-up, target validation, and potential drill-target refinement.

"Getting a survey aircraft over Aurora is a real step forward," stated Jared Suchan, Chief Executive Officer of Traction. "The Athabasca Basin is one of the most productive uranium districts in the world, and this program gives us our first project-wide read on where the radiometric signal is strongest across our 17 kilometers of strike. That is exactly the kind of data we need to determine where to concentrate next."

The Company expects the survey data to be processed and interpreted following completion of flight operations. Results will be integrated with existing geological and geophysical information to support future exploration planning at the Project.

## Qualified Person

Jared Suchan, Ph.D., P.Geo., CEO and Director of the Company, and a Qualified Person within the meaning of National Instrument 43-101 - Standards of Disclosure for Mineral Projects, has reviewed and approved the scientific and technical contents of this news release.

For a discussion of the Company's QA/QC and data verification processes and procedures, please see its most recently-filed technical report, a copy of which may be obtained under the Company's profile at <http://www.sedarplus.ca>.

## About Traction Uranium Corp.

Traction is in the business of mineral exploration and the development of discovery prospects in Canada, including its uranium project in the world-renowned Athabasca Region. We invite you to find out more about our exploration-stage activities across Canada's Western region at <https://tractionuranium.com>.

## About Cosa Resources Corp.

Cosa Resources is a Canadian uranium exploration company operating in northern Saskatchewan. Its portfolio comprises roughly 237,000 ha across multiple 100% owned and Cosa-operated Joint Venture projects in the Athabasca Basin region, all of which are underexplored, and the majority reside within or adjacent to established uranium corridors.

Cosa's award-winning management team has a long track record of success in Saskatchewan. In 2022, members of the Cosa team were awarded the AME Colin Spence Award for their previous involvement in discovering IsoEnergy's Hurricane deposit. In addition to Hurricane, Cosa personnel led teams or had integral roles in the discovery of Denison's Gryphon deposit and held key roles in the founding of both NexGen and IsoEnergy.

#### Forward-Looking Statements

*Certain statements contained in this press release constitute forward-looking information. These statements relate to future events or future performance. The use of any of the words "could", "intend", "expect", "believe", "will", "projected", "estimated" and similar expressions and statements relating to matters that are not historical facts are intended to identify forward-looking information and are based on the Company's current belief or assumptions as to the outcome and timing of such future events, including, in this news release, in relation to the Company's near and longer term exploration plans. Although such statements are based on reasonable assumptions of the Company's management, there can be no assurance that any conclusions or forecasts will prove to be accurate.*

*Forward-looking information involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. Such factors include: the risk that the Company does not exercise the option or acquire any interest in the Aurora project, risks inherent in the exploration and development of mineral projects, including risks relating to changes in project parameters as plans continue to be redefined and the risk that exploration and development activities will cost more than the amount budgeted for such activities by the Company; access and supply risks; operational risks; regulatory risks, including risks relating to the acquisition of the necessary licenses and permits; and financing, capitalization and liquidity risks. The forward-looking information contained in this release is made as of the date hereof, and the Company is not obligated to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, except as required by applicable securities laws. Because of the risks, uncertainties and assumptions contained herein, investors should not place undue reliance on forward-looking information. The foregoing statements expressly qualify any forward-looking information contained herein.*

*The CSE has neither approved nor disapproved the information contained herein.*
