

Ellis Martin Report: RUA Gold: CEO: Gold, Antimony, Fast-Track Permitting and 2028 Production Target

15:43 Uhr | [ABN Newswire](#)

Malibu, CA, United States - RUA Gold (TSE:RUA) (NZE:RGI) (OTCMKTS:NZAUF) (FRA:X9R) CEO Robert Eckford joins Ellis Martin on Money Talk Radio to discuss the company's advancing Old Creek Gold-Antimony Project in New Zealand's historic Reefton Goldfield.

In this interview, Eckford discusses the company's 19,000-meter drill program, with five drill rigs turning and approximately 10,000 meters already completed. The company is focused on moving resources from inferred to indicated as it advances toward a pre-feasibility study and a potential 2028 production timeline.

The conversation also covers the strategic importance of antimony, New Zealand's fast-track permitting environment, RUA Gold's broader regional vision, and the potential for Old Creek to become the starter mine for a multi-generational gold and antimony district.

Highlights include:

- Five drill rigs currently operating at Old Creek
- Approximately 10,000 meters completed in a 19,000-meter drill program
- Focus on upgrading resources for the pre-feasibility study
- Gold as the primary driver with antimony as a strategic critical mineral
- Potential fast-track permitting decision expected in July
- Targeted production timeline of 2028
- Broader Reefton Goldfield strategy including Alexander River and Big River
- Commitment to a lighter environmental footprint and local stakeholder engagement

RUA Gold trades on the TSX under RUA, on the NZX under RGI, on the OTC Markets under NZAUF, and on the Frankfurt Exchange under X9R.
