

Power Metals Appoints Senior Management Position

14:30 Uhr | [CNW](#)

Major Highlights

- Experienced professional exploration executive Mr. Geoff Heggie appointed as Vice President Exploration
- Mr. Heggie brings significant experience managing mineral exploration programs throughout Ontario
- Appointment strengthens the Company's technical capability, supported by Mr. Heggie's experience with Noront Resources (acquired by Wyloo) and Clean Air Metals

[Power Metals Corp.](#) ("Power Metals" or the "Company") (TSXV: PWM) (FRANKFURT: OAA1) (OTCQB: PWRMF) is pleased to announce the appointment of Geoff Heggie, Ph.D., as Vice President of Exploration, effective immediately.

Geoff Heggie, Ph.D., is registered with Professional Geoscientists (Ontario) and has extensive experience leading and advancing mineral exploration projects in Northwestern Ontario.

Mr. Heggie brings with him a strong blend of field, technical and leadership expertise gained through senior roles including Vice President Exploration of Clean Air Metals and Senior Geologist at Noront Resources (acquired by Wyloo in April 2022).

Haydn Daxter, CEO of Power Metals said: "Geoff's appointment strengthens our technical leadership as the Company continues to advance exploration across our flagship Case Lake cesium project. The appointment is an important strategic milestone, as we advance our 2026 exploration program ahead of progressing towards our development pathway."

The Company's new VP of Exploration stated: "I am excited to join Power Metals at such an important point in the Company's growth. The Company is demonstrating the hallmarks of a significant, scalable mineral system, with strong district-scale expansion potential. I look forward to leading the exploration team as we continue to refine the geological framework, prioritize targets and responsibly execute our ambitious, advanced exploration program aimed at unlocking the full potential of the Case Lake Project".

Mr. Heggie is a professional geologist with over 20 year's industry experience in Canada and Australia. He holds a Ph.D in Geology from the University of Western Australia, Perth for his work on komatiite mineralizing systems.

He was an integral part of the team that discovered the McFaulds No.8 Cu-Zn VMS lens in the Ring of Fire while with Noront Resources, the identification of PGE reefs hosted within the Seagull intrusion and the discovery of the down plunge extension of the orthomagmatic Escape deposit hosted within the Thunder Bay North Complex.

About Power Metals Corp (TSX-V: PWM)

Power Metals Corp (TSX-V: PWM) is a Canadian critical minerals company advancing high-quality exploration and development assets. Its flagship project is the 100 per cent owned Case Lake Property in Ontario, an advanced exploration-stage, high-grade cesium asset with additional exposure to lithium and tantalum.

Located around 80 km east of the established town of Cochrane, that has a long history of mining, near the

Ontario-Québec border, Case Lake is a district-scale project comprising 586 cell claims across six townships and a 10 km long LCT pegmatite trend spanning 14 granitic domes. This includes six spodumene dykes on the Henry Dome and the West Joe dyke, one of the highest-grade cesium systems discovered globally, with pollucite lenses returning grades up to 26 per cent and remaining open at depth.

Power Metals has completed 23,976 metres of drilling between 2017 and 2025 and identified 17 new targets and early indicators of additional mineralised lenses, supporting strong growth potential beyond the initial resource. Learn more at www.powermetalscorp.com.
