

Jiama Project to Optimize Multi-Metal Separation Technology With the Support of NMSC to Further Improve Multi-Metal Processing Recovery Rate

28.10.2010 | [Marketwired](#)

Vancouver, British Columbia -- ([Marketwire](#) - Oct. 28, 2010) - [China Gold International Resources Corp. Ltd.](#) (TSX: CGG) has signed a strategic cooperation agreement with the Nonferrous Metals Society of China (NMSC) in Beijing to collaborate on development of multi-metal separation technology, as well as academic and personnel exchange. The parties will focus on improving the methods of separation and recovery rate of the various metals contained in the Jiama Project in Tibet, which contains copper, molybdenum, gold, silver, lead and zinc. Special technical staff from the Jiama Project will work closely with processing specialists from NMSC to test separation technology of the Jiama Project in order to further optimize the metal recovery rate of the Jiama Project.

NMSC is a national industry society comprised of scholars, scientific and technical personnel and enterprise management from all fields in the non-ferrous and related industries. NMSC includes, in particular, the Academic Committee of Flotation—China's top professional committee on this field.

China National Gold Group Corporation is committed to mining resources by using only the most advanced technology from both from home and abroad during development, for the purpose of accelerating the realization of operating goals such as improving efficiency, saving energy, safety and environment protection, and social responsibilities. A large number of high-quality technical talents will be trained during the course of this development.

Forward-looking statements

Certain statements made herein, including the potential to improve recovery rates at the Jiama Project and other statements relating to matters that are not historical facts and statements of our beliefs, intentions and expectations about developments, results and events which will or may occur in the future, constitute "forward-looking information" within the meaning of applicable Canadian securities legislation and "forward-looking statements" within the meaning of the "safe harbor" provisions of the United States Private Securities Litigation Reform Act of 1995. Forward-looking information and statements are typically identified by words such as "anticipate", "could", "should", "expect", "seek", "may", "intend", "likely", "plan", "estimate", "will", "believe" and similar expressions suggesting future outcomes or statements regarding an outlook. All such forward-looking information and statements are based on certain assumptions and analysis made by China Gold International Resources Corp Ltd management in light of their experience and perception of historical trends, current conditions and expected future developments, as well as other factors management believes are appropriate in the circumstances. These statements, however, are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking information or statements. Important factors that could cause actual results to differ from these forward-looking statements include those described under the heading "Risks and Uncertainties" elsewhere in the Company's MD&A filed at [www.SEDAR.com](#). The reader is cautioned not to place undue reliance on forward-looking information or statements. Except as required by law the Company does not assume the obligation to revise or update these forward-looking statements after the date of this document or to revise them to reflect the occurrence of future, unanticipated events.
